

HLA EverGreen Funds

Feb 2019

Fund Features

1. Investment Objective

The fund is designed to provide investors with principal and enhanced profit protection via a systematic investment in a globally diversified multi asset (equities, currency, rates, commodities, property, hedge fund strategies) long short strategy.

2. Investment Strategy & Approach

The main investment strategy is executed via portfolio optimization methodology. The fund is open ended with defined maturity date. The investment execution is accomplished via a Floating Rate Negotiable Instrument of Deposits ("FRNID") issued by CIMB Bank Berhad.

The FRNID is principal protected at maturity by CIMB Bank. The FRNID dynamically adjusts its exposure to the strategy, such as to reduce exposure when the strategy has negative performance and increase exposure when it has positive performance.

3. Asset Allocation

The fund will invest in a FRNID.

4. Target Market

The fund is suitable for investors who wish to engage in long-term wealth-planning, such as for children's education, retirement planning or wealth-building for future generations, whereby the investor's return on their lifetime of investments will be safely locked at fund maturity.

Fund Details

Fund Management Fee	:	HLA EverGreen 2023 Fund HLA EverGreen 2025 Fund HLA EverGreen 2028 Fund	:	0%*p.a.	HLA EverGreen 2030 Fund HLA EverGreen 2035 Fund	:	1.30% p.a.
Fund Manager	:	Hong Leong Assurance Berhad					
Fund Inception	:	28 Dec 2010					
Benchmark	:	3-month Klibor + 2.65%					
Frequency of Unit Valuation	:	Weekly					

The Company reserves the right to change the Fund Management Fee (% p.a.) by giving the Policy Owner ninety (90) days prior written notice.

**The Company shall cease to charge the Fund Management Fee for HLA EverGreen 2023, HLA EverGreen 2025 and HLA EverGreen 2028 with effective from 22 Jan 2016, 5 Jul 2016 and 16 Jan 2019 respectively.*

Other Details

Fund Name	Unit Price (26/2/2019)	Fund Size (26/2/2019)	Fund Maturity Date	Minimum Guaranteed Unit Price at Fund Maturity (before tax)
HLA EverGreen 2023 Fund	: RM1.0292	RM25.20 mil	26 Dec 2023	1.2358
HLA EverGreen 2025 Fund	: RM0.9781	RM8.900 mil	26 Dec 2025	1.2670
HLA EverGreen 2028 Fund	: RM0.8961	RM10.69 mil	26 Dec 2028	1.3136
HLA EverGreen 2030 Fund	: RM0.8738	RM36.21 mil	26 Dec 2030	1.3446
HLA EverGreen 2035 Fund	: RM0.8434	RM580.87 mil	26 Dec 2035	1.4221

The Minimum Guaranteed Unit Price at Fund Maturity before tax will attract a portion of tax which has yet to be provided for. The further tax adjustment is the difference of tax payable on the capital gains of the funds determined at funds maturity and tax which has been provided for the funds through weekly unit pricing. The unit prices published weekly are on after tax basis.

Market Review (by CIMB Bank Berhad)

Max InvestSave decreased by 0.57% in the reported period with five out of eleven Underlying Assets moving against the Effective Max InvestSave Weightings. Losses were mainly due to the appreciation of American and European Equities where negative weightings were held and the decline of European Real Estate where positive weightings were held by the Effective Max InvestSave Weightings.

February 2019 was a mixed bag for American Equities. Market observers have been cutting Q1 2019 earnings estimates for listed companies as certain economic data are making it difficult to support earnings gains. Retail sales dropped the most since 2009 while jobless claims were higher than expected. Bonds have seen inflows and a subsequent rally partially due to concerns about limited upside in stocks. At the same time, positive sentiment in stocks among retail investors is at its highest since last November and the S&P 500 index has gained during seven of the last eight weeks. In Europe, the STOXX 600 index rose to the highest level in five months during the month. However, there have been concerns raised on the ability of the EU economy to register substantial growth this quarter after German manufacturing was shown to be at its lowest in six years and the Purchasing Managers Index (PMI) reading for the EU for the month signalled a contraction in the manufacturing sector.

On a separate note, British Prime Minister Theresa May is considering postponing the deadline for Brexit to prevent Britain from leaving the EU without a deal between both parties in place. Her main opponent, Jeremy Corbyn, backs the idea of holding a second Brexit referendum. Oil prices have rallied this year due to a concerted effort to reduce output by OPEC and its allies. Sanctions on Iran and Venezuela have also reduced global oil supply. Market participants are also hopeful of a trade deal being struck between the United States and China to reduce the possibility of escalating trade tensions. (Source: Bloomberg)

Net returns are adjusted for tax and fund management fees.

Those are the actual returns in the past eight (8) years, or since inception if shorter, and are strictly the performance of the investment-linked fund. Thus, the returns are not earned on the actual premium paid of the investment-linked product.

Investment Risks

All investments carry risks. Policy Owners must be prepared to accept certain degree of risk associated with this Investment. The following are the non-exhaustive list of risks associated to this fund.

1. Market Risk

Market risk stems from the fact that there are other economy-wide perils, which threaten all businesses. It is mainly caused by uncertainties in the economy, political and social environment.

2. Liquidity Risk

Liquidity risk is the risk that the fund invested cannot be readily sold and converted into cash. This may arise when the trading volume is low and/or where there is a lack of demand for the security.

3. Credit Risk

This refers to the possibility that the issuer of a security will not be able to make timely payments of interest or principal repayment on the maturity date. The default may lead to a fall in the value of the funds.

4. Interest Rate Risk

The level of interest rates has an impact on the value of investments. Any increase in rates will lead to a fall in the value of securities, thus affecting the value of the funds.

5. Country Risk

The foreign investment of a fund may be affected by the political & economic conditions of the country which the investments are made.

HLA EverGreen Funds

6. Deleverage Risk

Deleveraging may occur if the bond floor rises due to falling interest rates or due to nearing maturity, or due to sustained underperformance of the underlying asset. When this occurs, the Funds will unwind all allocation to the underlying asset and will effectively become a zero-coupon bond fund.

7. Currency Risk

This risk is associated with investments that are denominated in foreign currencies. Fluctuation in foreign exchange rates will have an impact on the value of the funds.

8. Performance Risk

This risk is associated with a feeder fund whereby the investments of such fund are not diversified. A feeder fund invests mainly into another collective investment scheme.

Risk Management

The Company has in place its Authorized Investment Framework which forms part of the Risk Management process. The authority framework will cover the nature and scope of the investment authority that is exercisable by various parties in managing the Company's investments. Besides this, sensitivity and stress testing is conducted to inform the Company's management the profit & loss profiles of their investments under different pre-defined risk scenarios and the necessary action to be taken if the potential losses exceed the Company's risk tolerance level.

Basis of Unit Valuation

- The assets of every fund are to be valued to determine the value at which units of a particular fund can be liquidated or purchased for investment purposes.
- The unit price of a unit of a fund shall be determined by the Company but in any event shall not be less than the value of fund of the relevant fund (as defined below), divided by the number of units of the given fund in issue on the business day before the valuation date, and the result adjusted to the nearest one hundredth of a cent.
- The maximum value of any asset of any fund shall not exceed the following price:
 - The last transacted market price at which those assets could be purchased or sold on the business day before the valuation date; or
 - In the case of securities for which market values are not readily available, the price at which, in our Investment Manager's opinion, the asset may have been purchased on the business day before the valuation date;
 plus any expenses which would have been incurred in its acquisition.
- To ensure fair treatment to all unit holders, the cost of acquiring and disposing of assets is recouped by making a transaction cost adjustment to the net asset value per unit.

Exceptional Circumstances

The Company reserves the right to defer the payment of benefits (other than death benefit) under this Policy for a period not exceeding six (6) months from the date the payment would have been normally effected if not for intervening events such as temporary closure of any Stock Exchange in which the fund is invested which the Company, in its discretion, may consider exceptional.

HLA EverGreen Funds

Performance of CIMB EverGreen Index Against Other Indices

Basis of Calculation of Past Performance

The historical performance of the fund is calculated based on the price difference over the period in consideration compared to the older price of the period in consideration.

$$\frac{\text{Unit Price}_t - \text{Unit Price}_{t-1}}{\text{Unit Price}_{t-1}}$$

Others

HLA EverGreen Funds are managed by Hong Leong Assurance Berhad (HLA). Allocated premiums of the policy invested in the fund are invested by HLA on behalf of the Policy Owner in a FRNID issued by CIMB Bank Berhad. The amount invested in the FRNID is guaranteed by the issuer if held to maturity. If the issuer of the FRNID defaults or becomes insolvent, the Policy Owner risks losing part or all of his/her allocated premium amounts that were invested into the FRNID on his/her behalf by HLA. Should the issuer/financial institutions default the above investment instrument, the Minimum Guaranteed Unit Price at Fund Maturity will not be applicable.

THIS IS AN INSURANCE PRODUCT THAT IS TIED TO THE PERFORMANCE OF THE UNDERLYING ASSETS, AND IS NOT A PURE INVESTMENT PRODUCT SUCH AS UNIT TRUSTS.

Disclaimer:

Policy Owner must evaluate your options carefully and satisfy yourself that the investment-linked fund chosen meets your risk appetite. Past performance of the fund is not an indication of its future performance. The intention of this document is to enable Policy Owner to better understand the fund features and details in order to assist Policy Owner to making an informed decision. This document shall not be construed as professional advice on investment choices.
