

Hong Leong Smart Growth Fund (HLSGF)

May 2017

Fund Features

1. Investment Objective

The primary objective of the fund is to provide investors with steady long-term capital growth at moderate risk.

2. Investment Strategy & Approach

The strategy is to provide investors an access into a diversified portfolio of growth stocks listed on Bursa Malaysia and/or in any foreign stock exchanges that offer potential capital appreciation at moderate risk. The fund may feed into collective investment schemes that meet the fund's objective. At inception, HLSGF will invest by feeding into Kenanga Growth Fund ("Target Fund") with the option to increase the number of funds or replace the Target Fund in future. The Target Fund's assets are actively invested in a diversified portfolio of Malaysian equity and equity-related securities of companies with sustainable business model that is trading at a discount to its intrinsic value.

3. Asset Allocation

Under normal market conditions, the Target Fund's equity exposure is expected to range from 75% to 95% of the Target Fund's NAV with the balance in money market instruments, fixed deposits and/or cash.

4. Target Market

This fund is suitable for investors who have long term investment time horizon and have a moderate risk profile with tolerance for short-term periods of volatility.

Market Review, Outlook & Strategy relevant to Target Fund

Global equities has remained subdued in May as markets had essentially priced in Macron's victory in the French election and attention shifting on Trump's administration ability to pass on its reform proposals. Apart from the political noise in US, the economy grew faster than initially reported with upward revision of 1Q GDP to 1.2%, easing some concerns on sluggish start to 2017. Europe economic data has shown continuous improvement but ECB reassessed their dovish policy stance. In an unexpected move, UK Prime Minister Theresa May announced snap election in June to allow her more flexibility in Brexit negotiations. The Dow Jones Industrial Index and Euro Stoxx Index were relatively unchanged in May, while UK FTSE Index outperformed with 4.74% as UK exporters expected to benefit from sterling weaknesses.

In China, President Xi Jinping has pledged USD124 billion of infrastructure spending at the Silk Road summit in promoting "One Belt, One Road" but the initiative was not enough to boost sentiment amid concerns on increased of short term rate and decline in liquidity. In later part of the month, Moody's downgrade of China and Hong Kong seems to be shrugged off by the markets. Shanghai Index ended lower by 1.19% and Hang Seng Index up by 4.25% in May.

On the regional front, Asian bourses performed relatively well, led by South Korea's Kospi Index which up by 6.44%. For domestic market, the stronger than expected 1Q GDP growth of 5.6% yoy failed to lift market sentiment with KLCI ended slightly lower by 0.12% to 1,765 points. The broader market underperformed the KLCI, with the FBM Small Cap Index fell by 2.35% to 17,247 points and FBM Emas Shariah fell by 1.30% to 12,804 points. There were a few negative surprises during the month with the termination of Bandar Malaysia agreements and cancellation of the planned merger between UMW O&G with Orkim and Icon Offshore. Average daily value traded on Bursa in May was 6% higher mom at MYR2.99 billion. Meanwhile, Ringgit appreciated along with regional peers by 1.4% to MYR4.28 per USD as foreign funds continued to flow into emerging markets. The Brent and WTI crude fell by 2.05% and 2.48% respectively in May as the outcome of OPEC meeting failed to excite the market.

Market Outlook & Fund Strategy

Fed policymakers indicated that slower economic data in 1Q is transitory with activity picking up for the rest of the year and highly likely to proceed with the rate hike on June 14, 2017. Trump's unpredictability and protectionist leanings remain as a key risk. While the Brexit process could also be a source of volatility, the political risks in EU appears to be eased and ECB is likely to wait for more compelling evidence before contemplating a change of stance in its monetary policy. On the positive note, the possible inclusion of Chinese equities in MSCI Indices will be announced on June 20, 2017 and this could be a significant event for Asian market.

Stock picking remains key for outperformance. We continue to advocate a defensive portfolio strategy and prefer companies driven by resilient earnings with exposure to selective themes like beneficiaries of rising foreign direct investment, construction, GLC reform/restructuring plays, domestic consumption and infrastructure.

Hong Leong Smart Growth Fund (HLSGF)

Actual Annual Investment Returns for the Past Five (5) Calendar Years

Year	2012	2013	2014	2015	2016
Benchmark	2.8%	10.5%	-5.7%	-3.9%	-3.0%
HLSGF- Gross	3.3%	27.8%	11.8%	23.1%	2.3%
HLSGF - Net	1.6%	24.1%	9.3%	19.8%	0.6%

Net returns are adjusted for tax and fund management fees.

Those are the actual returns in the past five (5) years, or since inception if shorter, and are strictly the performance of the investment-linked fund. Thus, the returns are not earned on the actual premium paid of the investment-linked product.

The fund was only launched on 1 October 2012. The actual investment returns are calculated based on unit price from 1 October 2012 to 31 December 2012.

Investment Risks

All investments carry risks. Policy Owners must be prepared to accept certain degree of risk associated with this investment. The following are the detailed explanation of the risk associated to this fund.

1. Market Risk

Market risk stems from the fact that there are other economy-wide perils, which threaten all businesses. It is mainly caused by uncertainties in the economy, political and social environment.

2. Liquidity Risk

Liquidity risk is the risk that the fund invested cannot be readily sold and converted into cash. This may arise when the trading volume is low and/or where there is a lack of demand for the security.

3. Credit Risk

This refers to the possibility that the issuer of a security will not be able to make timely payments of interest or principal repayment on the maturity date. The default may lead to a fall in the value of the funds.

4. Interest Rate Risk

The level of interest rates has an impact on the value of investments. Any increase in rates will lead to a fall in the value of securities, thus affecting the value of the funds.

5. Country Risk

The foreign investment of a fund may be affected by the political & economic conditions of the country which the investments are made.

6. Currency Risk

This risk is associated with investments that are denominated in foreign currencies. Fluctuation in foreign exchange rates will have an impact on the value of the funds.

7. Concentration Risk

This risk is associated with a feeder fund whereby the investments of such fund are not diversified. A feeder fund invests mainly into another collective investment scheme.

Risk Management

The Company has in place its Authorized Investment Framework which forms part of the Risk Management process. The authority framework will cover the nature and scope of the investment authority that is exercisable by various parties in managing the Company's investments. Besides this, sensitivity and stress testing is conducted to inform the Company's management the profit & loss profiles of their investments under different pre-defined risk scenarios and the necessary action to be taken if the potential losses exceed the Company's risk tolerance level.

Basis of Unit Valuation

- The assets of every fund are to be valued to determine the value at which units of a particular fund can be liquidated or purchased for investment purposes.
- The unit price of a unit of a fund shall be determined by the Company but in any event shall not be less than the value of fund of the relevant fund (as defined below), divided by the number of units of the given fund in issue on the business day before the valuation date, and the result adjusted to the nearest one hundredth of a cent.
- The maximum value of any asset of any fund shall not exceed the following price:
 - The last transacted market price at which those assets could be purchased or sold on the business day before the valuation date; or
 - In the case of securities for which market values are not readily available, the price at which, in our Investment Manager's opinion, the asset may have been purchased on the business day before the valuation date; plus any expenses which would have been incurred in its acquisition.
- To ensure fair treatment to all unit holders, the cost of acquiring and disposing of assets is recouped by making a transaction cost adjustment to the net asset value per unit.

Exceptional Circumstances

The Company reserves the right to defer the payment of benefits (other than death benefit) under this Policy for a period not exceeding six (6) months from the date the payment would have been normally effected if not for intervening events such as temporary closure of any Stock Exchange in which the fund is invested which the Company, in its discretion, may consider exceptional.

Target Fund Details

Kenanga Growth Fund is an Equity fund managed by Kenanga Investors Berhad. The past performance of this fund is as follows:

Year	2012	2013	2014	2015	2016
Performance	14.1%	26.4%	9.3%	20.9%	-0.1%

Hong Leong Smart Growth Fund (HLSGF)

Basis of Calculation of Past Performance

The historical performance of the fund is calculated based on the price difference over the period in consideration compared to the older price of the period in consideration.

$$\frac{\text{Unit Price}_t - \text{Unit Price}_{t-1}}{\text{Unit Price}_{t-1}}$$

For the underlying Target Fund, past performance is calculated after adjusting for distribution and/or additional units, if any.

Others

Hong Leong Smart Growth Fund is managed by Hong Leong Assurance Berhad (HLA).
