Market Review, Outlook & Strategy

Investor optimism in global markets was positive in the month of October. The Dow Jones scaled to a record high on the back of positive economic data combined with the bright outlook for corporate earnings and the highly-anticipated implementation of President Trump's tax reform plan. Despite persistent worries over a possible North Korea missile launch, Asia Pacific markets also performed strongly on the back of upbeat Chinese economic data. The re-election of Shinzo Abe as Japan Prime Minister following the two-thirds wins by the Liberal Democratic Party also boosted markets.

The FBM KLCI, however, bucked the trend as performance lagged its regional peers. This was due to persistent foreign selling which dragged and dampened sentiment. Foreign selling amounted to RM226.3m during the month. As a result, the Ringgit depreciated by 0.3% mom to close at RM4.2320/US\$. Budget 2018 was a non-event for the equity market but nevertheless it met market expectations with a number of "rakyat friendly" initiatives to put more money in the hands of consumers, especially the lower income households. Personal income tax cuts, various cash handouts and the increase in civil servants' overall emoluments should boost domestic consumption. Crude oil prices during the month also jumped by almost 6% mom to reach a high of close to US\$55 a barrel, boosted by Saudi Arabian export cuts in November.

The FBM KLCI was down by 7.7pts (-0.4% mom) to 1,747.92pts in October. The broader market fared better than the FBM KLCI with the FBMMES (Ace market) rising +0.53% mom to 12,597.27 pts. Small-caps fared a lot better in October, with the FBM Small Cap Index rising by +2.85% mom to 17,433.83 pts.

As we move into 2018, the global economy should continue the current growth momentum supported by the still-accommodative monetary policy and moderate inflationary environment. There could be some volatility in regional markets towards year end on the back of the Fed's December FOMC meeting where markets are expecting one rate hike and the introduction of the tax reform bill in November. On the domestic front, we are entering into the third quarter results reporting season where expectations are for fewer negative surprises. Meanwhile, we continue to favour infrastructure related and building material names as Budget 2018 confirms the government's intention to spend in this segment. We are also keeping a close watch of signs of demand recovery in the property and auto sectors as consumer spending may improve with the Budget initiatives to boost consumer consumption.

HLA Venture Flexi Fund (HLAVFF)

Actual Annual Investment Returns for the Past Five (5) Calendar Years

Year	2012	2013	2014	2015	2016
Benchmark	10.3%	10.5%	-5.7%	-3.9%	-3.0%
HLAVFF- Gross	12.7%	24.1%	-3.9%	12.2%	-2.4%
HLAVFF - Net	10.2%	20.8%	-5.0%	9.8%	-3.7%

Net returns are adjusted for tax and fund management fees.

Those are the actual returns in the past five (5) years, or since inception if shorter, and are strictly the performance of the investment-linked fund. Thus, the returns are not earned on the actual premium paid of the investment-linked product.

Investment Risks

All investments carry risks. Policy Owners must be prepared to accept certain degree of risk associated with this Investment. The following are the detailed explanation of the risk associated to this fund.

1. Market Risk

Market risk stems from the fact that there are other economy-wide perils, which threaten all businesses. It is mainly caused by uncertainties in the economy, political and social environment.

2. Liquidity Risk

Liquidity risk is the risk that the fund invested cannot be readily sold and converted into cash. This may arise when the trading volume is low and/or where there is a lack of demand for the security.

3. Credit Risk

This refers to the possibility that the issuer of a security will not be able to make timely payments of interest or principal repayment on the maturity date. The default may lead to a fall in the value of the funds.

4. Interest Rate Risk

The level of interest rates has an impact on the value of investments. Any increase in rates will lead to a fall in the value of securities, thus affecting the value of the funds.

5. Country Risk

The foreign investment of a fund may be affected by the political & economic conditions of the country which the investments are made.

6. Currency Risk

This risk is associated with investments that are denominated in foreign currencies. Fluctuation in foreign exchange rates will have an impact on the value of the funds.

Risk Management

The Company has in place its Authorized Investment Framework which forms part of the Risk Management process. The authority framework will cover the nature and scope of the investment authority that is exercisable by various parties in managing the Company's investments. Besides this, sensitivity and stress testing is conducted to inform the Company's management the profit & loss profiles of their investments under different pre-defined risk scenarios and the necessary action to be taken if the potential losses exceed the Company's risk tolerance level.

Basis of Unit Valuation

- The assets of every fund are to be valued to determine the value at which units of a particular fund can be liquidated or purchased for investment purposes.
- The unit price of a unit of a fund shall be determined by the Company but in any event shall not be less than the value of fund of the relevant fund (as defined below), divided by the number of units of the given fund in issue on the business day before the valuation date, and the result adjusted to the nearest one hundredth of a cent.
- The maximum value of any asset of any fund shall not exceed the following price:
 - The last transacted market price at which those assets could be purchased or sold on the business day before the valuation date; or
 - In the case of securities for which market values are not readily available, the price at which, in our Investment Manager's opinion, the asset may have been purchased on the business day before the valuation date; plus any expenses which would have been incurred in its acquisition.
- To ensure fair treatment to all unit holders, the cost of acquiring and disposing of assets is recouped by making a transaction cost adjustment to the net asset value per unit.

Exceptional Circumstances

The Company reserves the right to defer the payment of benefits (other than death benefit) under this Policy for a period not exceeding six (6) months from the date the payment would have been normally effected if not for intervening events such as temporary closure of any Stock Exchange in which the fund is invested which the Company, in its discretion, may consider exceptional.

Basis of Calculation of Past Performance

The historical performance of the fund is calculated based on the price difference over the period in consideration compared to the older price of the period in consideration.

$$\frac{\text{Unit Price}_t - \text{Unit Price}_{t-1}}{\text{Unit Price}_{t-1}}$$

Others
