HLA EverGreen Funds

Mar 2018

Fund Features

1. Investment Objective

The fund is designed to provide investors with principal and enhanced profit protection via a systematic investment in a globally diversified multi asset (equities, currency, rates, commodities, property, hedge fund strategies) long short strategy.

2. Investment Strategy & Approach

The main investment strategy is executed via portfolio optimization methodology. The fund is open ended with defined maturity date. The investment execution is accomplished via a Floating Rate Negotiable Instrument of Deposits ("FRNID") issued by CIMB Bank Berhad.

The FRNID is principal protected at maturity by CIMB Bank. The FRNID dynamically adjusts its exposure to the strategy, such as to reduce exposure when the strategy has negative performance and increase exposure when it has positive performance.

3. Asset Allocation

The fund will invest in a FRNID.

4. Target Market

The fund is suitable for investors who wish to engage in long-term wealth-planning, such as for children's education, retirement planning or wealth-building for future generations, whereby the investor's return on their lifetime of investments will be safely locked at fund maturity.

Fund Details

Fund Management Fee	:	HLA EverGreen 2023 Fund HLA EverGreen 2025 Fund	: 0%*p.a.	HLA EverGreen 2028 Fund HLA EverGreen 2030 Fund HLA EverGreen 2035 Fund	: 1.30% p.a.
Fund Manager	:	Hong Leong Assurance Berhad			
Fund Inception	:	28 Dec 2010			
Benchmark	:	3-month Klibor + 2.65%			
Frequency of Unit Valuation	:	Weekly			

The Company reserves the right to change the Fund Management Fee (% p.a.) by giving the Policy Owner ninety (90) days prior written notice.
**The Company shall cease to charge the Fund Management Fee for HLA EverGreen 2023 and HLA EverGreen 2025 with effective from 22 Jan 2016 and 5 July 2016 respectively.*

Other Details

Fund Name	Unit Price (27/3/2018)	Fund Size (27/3/2018)	Fund Maturity Date	Minimum Guaranteed Unit Price at Fund Maturity (before tax)
HLA EverGreen 2023 Fund	: RM0.9907	RM25.55 mil	26 Dec 2023	1.2358
HLA EverGreen 2025 Fund	: RM0.9435	RM7.65 mil	26 Dec 2025	1.2670
HLA EverGreen 2028 Fund	: RM0.8880	RM7.86 mil	26 Dec 2028	1.3136
HLA EverGreen 2030 Fund	: RM0.8687	RM28.61 mil	26 Dec 2030	1.3446
HLA EverGreen 2035 Fund	: RM0.8555	RM434.20 mil	26 Dec 2035	1.4221

The Minimum Guaranteed Unit Price at Fund Maturity before tax will attract a portion of tax which has yet to be provided for. The further tax adjustment is the difference of tax payable on the capital gains of the funds determined at funds maturity and tax which has been provided for the funds through weekly unit pricing. The unit prices published weekly are on after tax basis.

Market Review *(by CIMB Bank Berhad)*

Max InvestSave decreased by 2.06% in the reported period with five out of eleven Underlying Assets moving against the Effective Max InvestSave Weightings. Losses were mainly due to the depreciation of American and Japanese Equities where positive weightings were held by the Effective Max InvestSave Weightings.

March 2018 had a rocky start for American equities as speculation about aggressive interest rate hikes by the Federal Reserve as well as President Trump's protectionist threats involving steel and aluminium imports negaively impacted the stock market. Matters took a positive turn when the February 2018 jobs report was released to positve fanfare with the economy adding more than 300,000 jobs during that period. The President also showed signs of possibly compromising on the aforementioned tariffs while also cooling tensions between the United States and North Korea. The Federal Reserve also increased the benchmark interest rate by 0.25%. In Europe, economic confidence continued its slide for the third successive month, raising concerns about moderating growth in the Eurozone. However, the European Central Bank (ECB) expressed its confidence in the region's economy, stating that the level of investment is at a decade high level and private sector debt is falling. The economy is forecasted to grow by 2.4% this year, an uptick from the 2.3% increase last year. Even so, inflation in the EU is still below the ECB's intended target.

Japanese equities registered one of its best months in two years. The Bank of Japan (BoJ) is planning to taper its financial stimulus program but is unable to do so without attracting much attention after market participants speculated about possible interest rate hikes after noticing reduced purchases by the BoJ. This has subsequently caused the Yen to appreciate. Oil prices surged in March as inventories fell and the appointment of a new national security adviser in the US stoked fears about reimposing trade sanctions against Iran, a major oil producer. Net returns are adjusted for tax and fund management fees.
Those are the actual returns in the past five (5) years, or since inception if shorter, and are strictly the performance of the investment-linked fund. Thus, the returns are not earned on the actual premium paid of the investment-linked product.

Investment Risks
All investments carry risks. Policy Owners must be prepared to accept certain degree of risk associated with this Investment. The following are the non-exhaustive list of risks associated to this fund.

1. **Market Risk**
   Market risk stems from the fact that there are other economy-wide perils, which threaten all businesses. It is mainly caused by uncertainties in the economy, political and social environment.

2. **Liquidity Risk**
   Liquidity risk is the risk that the fund invested cannot be readily sold and converted into cash. This may arise when the trading volume is low and/or where there is a lack of demand for the security.

3. **Credit Risk**
   This refers to the possibility that the issuer of a security will not be able to make timely payments of interest or principal repayment on the maturity date. The default may lead to a fall in the value of the funds.

4. **Interest Rate Risk**
   The level of interest rates has an impact on the value of investments. Any increase in rates will lead to a fall in the value of securities, thus affecting the value of the funds.

5. **Country Risk**
   The foreign investment of a fund may be affected by the political & economic conditions of the country which the investments are made.

6. Deleverage Risk
Deleveraging may occur if the bond floor rises due to falling interest rates or due to nearing maturity, or due to sustained underperformance of the underlying asset. When this occurs, the Funds will unwind all allocation to the underlying asset and will effectively become a zero-coupon bond fund.

7. Currency Risk
This risk is associated with investments that are denominated in foreign currencies. Fluctuation in foreign exchange rates will have an impact on the value of the funds.

8. Performance Risk
This risk is associated with a feeder fund whereby the investments of such fund are not diversified. A feeder fund invests mainly into another collective investment scheme.

Risk Management
The Company has in place its Authorized Investment Framework which forms part of the Risk Management process. The authority framework will cover the nature and scope of the investment authority that is exercisable by various parties in managing the Company's investments. Besides this, sensitivity and stress testing is conducted to inform the Company's management the profit & loss profiles of their investments under different pre-defined risk scenarios and the necessary action to be taken if the potential losses exceed the Company's risk tolerance level.

Basis of Unit Valuation
1. The assets of every fund are to be valued to determine the value at which units of a particular fund can be liquidated or purchased for investment purposes.
2. The unit price of a unit of a fund shall be determined by the Company but in any event shall not be less than the value of fund of the relevant fund (as defined below), divided by the number of units of the given fund in issue on the business day before the valuation date, and the result adjusted to the nearest one hundredth of a cent.
3. The maximum value of any asset of any fund shall not exceed the following price:
   a) The last transacted market price at which those assets could be purchased or sold on the business day before the valuation date; or
   b) In the case of securities for which market values are not readily available, the price at which, in our Investment Manager's opinion, the asset may have been purchased on the business day before the valuation date;

   plus any expenses which would have been incurred in its acquisition.
4. To ensure fair treatment to all unit holders, the cost of acquiring and disposing of assets is recouped by making a transaction cost adjustment to the net asset value per unit.

Exceptional Circumstances
The Company reserves the right to defer the payment of benefits (other than death benefit) under this Policy for a period not exceeding six (6) months from the date the payment would have been normally effected if not for intervening events such as temporary closure of any Stock Exchange in which the fund is invested which the Company, in its discretion, may consider exceptional.

HLA EverGreen Funds

Performance of CIMB EverGreen Index Against Other Indices

Basis of Calculation of Past Performance

The historical performance of the fund is calculated based on the price difference over the period in consideration compared to the older price of the period in consideration.

$$\frac{\text{Unit Price}_t - \text{Unit Price}_{t-1}}{\text{Unit Price}_{t-1}}$$

Others

HLA EverGreen Funds are managed by Hong Leong Assurance Berhad (HLA). Allocated premiums of the policy invested in the fund are invested by HLA on behalf of the Policy Owner in a FRNID issued by CIMB Bank Berhad. The amount invested in the FRNID is guaranteed by the issuer if held to maturity. If the issuer of the FRNID defaults or becomes insolvent, the Policy Owner risks losing part or all of his/her allocated premium amounts that were invested into the FRNID on his/her behalf by HLA. Should the issuer/financial institutions default the above investment instrument, the Minimum Guaranteed Unit Price at Fund Maturity will not be applicable.

THIS IS AN INSURANCE PRODUCT THAT IS TIED TO THE PERFORMANCE OF THE UNDERLYING ASSETS, AND IS NOT A PURE INVESTMENT PRODUCT SUCH AS UNIT TRUSTS.

Disclaimer:

Policy Owner must evaluate your options carefully and satisfy yourself that the investment-linked fund chosen meets your risk appetite. Past performance of the fund is not an indication of its future performance. The intention of this document is to enable Policy Owner to better understand the fund features and details in order to assist Policy Owner to making an informed decision. This document shall not be construed as professional advice on investment choices.
