

# HLA Horizon Funds

Feb 2019

## Fund Features

### 1. Investment Objective

The fund is designed to offer customers a Minimum Guaranteed Unit Price upon fund maturity and yet offer the opportunity to enhance returns via a leveraged exposure. The fund will periodically lock in part of the gains (10 years after launch of the fund) and thereby increasing the customers' Minimum Guaranteed Unit Price at fund maturity.

The fund is open ended with three maturity dates to match customer financial planning needs: Horizon28 to be matured in Year 2028, Horizon38 in Year 2038 and Horizon48 in Year 2048.

### 2. Investment Strategy & Approach

The fund will invest into Floating Rate Negotiable Instrument of Deposit (FRNID). FRNID allocate into two major components: Mean Variance Optimization (MVO) Strategy and Zero-coupon Negotiable Instrument of Deposit (ZNID).

To enhance investment return, MVO Strategy will be leveraged by 3 times. This MVO Strategy uses the Efficient Frontier to find the optimal portfolio returns for a defined risk, limiting to basket volatility to around 8%. The portfolio consists of 4 asset classes:

- (i) 4 equities indices (S&P500, Euro Stoxx 50, Hang Seng China Enterprises, MSCI Emerging Market),
- (ii) 2 bond indices (Franklin Templeton & PIMCO),
- (iii) Spot Gold index
- (iv) Cash index

These indices are published at Bloomberg to provide transparency to customer.

The ZNID provides the Minimum Guaranteed Unit Price upon each fund's maturity. The initial Minimum Guaranteed Unit Price as follow:

Fund	Initial Minimum Guaranteed Unit Price at fund maturity
HLA Horizon28	RM 1.00
HLA Horizon38	RM 1.50
HLA Horizon48	RM 2.00

Over time, Minimum Guaranteed Unit Price may go up via a profit taking mechanism. This mechanism will lock the gains provided the condition stated below is met, by transferring portion of gains from the MVO Strategy to the ZNID on a yearly basis as follow:

Fund Year	% of the MVO Strategy Gains
1 to 10	0%
11 to 20	50%
21 to 30	100%

The condition for profit taking:

$$\left( \frac{MVO_t}{MVO_{prevPT}} - 1 \right) > 0$$

Where,

$MVO_t$  is the mark-to-market value of MVO per unit

$MVO_{prevPT}$  is the mark-to-market value of MVO at the time of previous actual executed profit taking per unit

### 3. Target Market

The fund is suitable for investors who wish to engage in mid-term and long-term wealth-planning. The feature of this Minimum Guaranteed Unit Price upon fund maturity will help to safeguard the savings goal for their children's education, retirement planning or wealth-building for future generations.

## Fund Details

<b>Fund Management Fee</b>	: 1.30% p.a.
<b>Fund Manager</b>	: Hong Leong Assurance Berhad
<b>Fund Inception</b>	: 9 Oct 2018
<b>Benchmark</b>	: 3-month Klibor *+ 2.65%
<b>Frequency of Unit Valuation</b>	: Weekly

The Company reserves the right to change the Fund Management Fee (% p.a.) by giving the Policy Owner ninety (90) days prior written notice.

HLA Horizon28	2.16%	-
HLA Horizon38	3.27%	-
HLA Horizon48	4.11%	-

## Exposure to MVO Strategy

Fund	Exposure as at 26/2/2019
HLA Horizon28	107.94%
HLA Horizon38	124.30%
HLA Horizon48	166.40%

## Market Review (by Hong Leong Bank Berhad)

Market fundamentals are still strong, but there are increased risks associated with slowing growth in Europe and China.

Eurozone growth momentum somewhat recovered recently. However, growth continues to remain low and the cycle is vulnerable -evidenced in ECB's policy action and downward revision of 2019 growth forecasts. Risks remain on the downside –“No deal” Brexit, trade war escalation could tip economy into recession. We expect 2019 euro area GDP growth of 0.9%.

The ECB's March policy meeting announcements highlighted a clear deterioration in the macro outlook. The time commitment to unchanged policy rates was extended by three months from “through the summer” to “the end of 2019”. Overall, we think the policy response was muted compared to relatively dovish tone of MrDraghi.

China's 2019 National People's Congress signaled policy easing on both fiscal and monetary front to support slowing growth. The government cut its 2019 GDP growth target to '6-6.5%' from 'around 6.5%'.

We continue to expect the Fed to hike rates later this year, though focus will shift to balance sheet policy for now. Recent comments from Federal reserve officials support our expectation for one more rate hike this year and one in 2020.

We see EM at an inflection point amid soft external growth push and weak pull from domestic development. A lighter and less intense version of idiosyncratic risks will weigh on several important EMs (China, Brazil, Russia, Turkey, and South Africa) in the near term.

Gains of MVO Strategy (per unit)	HLA Horizon28	HLA Horizon38	HLA Horizon48
Previous actual executed profit taking at -	N/A	N/A	N/A
As at 26 Feb 2019	3.93%	4.22%	5.65%
As at 29 Jan 2019	1.96%	1.94%	2.59%

The next observation date for profit taking is 8 Oct 2029. If this date is not a Business Day, then shall be the Business Day immediately following the date stated.

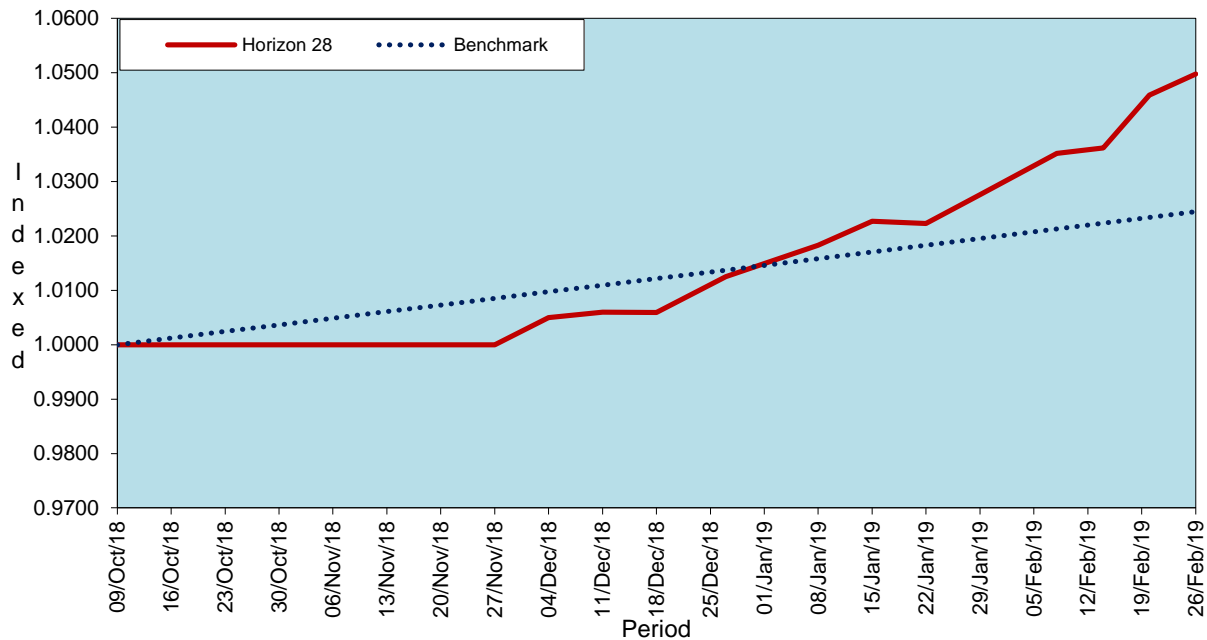

## Underlying Asset in the MVO Strategy as at 26 Feb 2019

### Investment Risks

All investments carry risks. Policy Owners must be prepared to accept certain degree of risk associated with this Investment. The following are the detailed explanation of the risk associated to this fund.

#### 1. Market Risk

Market risk stems from the fact that there are other economy-wide perils, which threaten all businesses. It is mainly caused by uncertainties in the economy, political and social environment.

#### 2. Liquidity Risk

Liquidity risk is the risk that the fund invested cannot be readily sold and converted into cash. This may arise when the trading volume is low and/or where there is a lack of demand for the security.

#### 3. Credit Risk

This refers to the possibility that the issuer of a security will not be able to make timely payments of interest or principal repayment on the maturity date. The default may lead to a fall in the value of the funds.

#### 4. Interest Rate Risk

The level of interest rates has an impact on the value of investments. Any increase in rates will lead to a fall in the value of securities, thus affecting the value of the funds.

#### 5. Deleverage Risk

Deleveraging may occur if the bond floor rises due to falling interest rates or due to nearing maturity, or due to sustained underperformance of the underlying asset. When this occurs, the Funds will unwind all allocation to the underlying asset and will effectively become a zero-coupon bond fund.

#### 6. Currency Risk

This risk is associated with investments that are denominated in foreign currencies. Fluctuation in foreign exchange rates will have an impact on the value of the funds.

#### 7. Country Risk

The foreign investment of a fund may be affected by the political & economic conditions of the country which the investments are made.

### Risk Management

The Company has in place its Authorized Investment Framework which forms part of the Risk Management process. The authority framework will cover the nature and scope of the investment authority that is exercisable by various parties in managing the Company's investments. Besides this, sensitivity and stress testing is conducted to inform the Company's management the profit & loss profiles of their investments under different pre-defined risk scenarios and the necessary action to be taken if the potential losses exceed the Company's risk tolerance level.

## HLA Horizon Funds

### Basis of Unit Valuation

1. The assets of every fund are to be valued to determine the value at which units of a particular fund can be liquidated or purchased for investment purposes.
2. The unit price of a unit of a fund shall be determined by the Company but in any event shall not be less than the value of fund of the relevant fund (as defined below), divided by the number of units of the given fund in issue on the business day before the valuation date, and the result adjusted to the nearest one hundredth of a cent.
3. The maximum value of any asset of any fund shall not exceed the following price:
  - a) The last transacted market price at which those assets could be purchased or sold on the business day before the valuation date; or
  - b) In the case of securities for which market values are not readily available, the price at which, in our Investment Manager's opinion, the asset may have been purchased on the business day before the valuation date; plus any expenses which would have been incurred in its acquisition.
4. To ensure fair treatment to all unit holders, the cost of acquiring and disposing of assets is recouped by making a transaction cost adjustment to the net asset value per unit.

### Exceptional Circumstances

The Company reserves the right to defer the payment of benefits (other than death benefit) under this Policy for a period not exceeding six (6) months from the date the payment would have been normally effected if not for intervening events such as temporary closure of any Stock Exchange in which the fund is invested which the Company, in its discretion, may consider exceptional.

### Basis of Calculation of Past Performance

The historical performance of the fund is calculated based on the price difference over the period in consideration compared to the older price of the period in consideration.

$$\frac{\text{Unit Price}_t - \text{Unit Price}_{t-1}}{\text{Unit Price}_{t-1}}$$

### Others

HLA Horizon Funds are managed by Hong Leong Assurance Berhad (HLA). Allocated premiums of the policy invested in the fund are invested by HLA on behalf of the Policy Owner in a FRNID issued by Hong Leong Bank Berhad. If the issuer of the FRNID defaults or becomes insolvent, the Policy Owner risks losing part or all of his/her allocated premium amounts that were invested into the FRNID on his/her behalf by HLA. Should the issuer/financial institutions default the above investment instrument, the Minimum Guaranteed Unit Price at Fund Maturity will not be applicable.

**THIS IS AN INSURANCE PRODUCT THAT IS TIED TO THE PERFORMANCE OF THE UNDERLYING ASSETS, AND IS NOT A PURE INVESTMENT PRODUCT SUCH AS UNIT TRUSTS.**
