

HLA Balanced Fund (HLABF)

January 2023

Fund Features

1. Investment Objective

This fund aims to achieve consistent capital growth over the medium-to-long term by investing in a diversified investment portfolio containing a balanced mixture of equities and fixed income securities.

2. Investment Strategy & Approach

HLABF will principally feed into third party collective investment schemes that meet the fund's objective. HLABF may also invest directly in a diversified portfolio of domestic and/or foreign assets including equities, equity-related securities, deposits or any other financial instruments that offer potential capital appreciation.

At inception, the fund will invest by feeding into Hong Leong Balanced Fund ("Target Fund"), with the option to increase the number of funds or replace the Target Fund in future.

The Target Fund invests in equity securities of companies operating in Malaysia. Generally, companies that have low shareholders' risk, strong balance sheets with strong operating cash flows and sustainable earnings, and low relative valuations represented by reasonable price earnings ratio (PER) or price-to-book ratios (P/B) are selected. The manager combines a "top-down" asset and sector allocation analysis with a "bottom-up" stock selection process for the equity portion of the fund. For the fixed income portion of the Target Fund, the manager maintains fundamental and active management of the Target Fund, where investment decisions are made in accordance to future projections of interest rates, return on investments and access to liquidity.

3. Asset Allocation

The Target Fund will invest a minimum of 40% and maximum of 60% of its NAV in equities. The balance of its NAV will be invested in fixed income securities and money market instruments.

4. Target Market

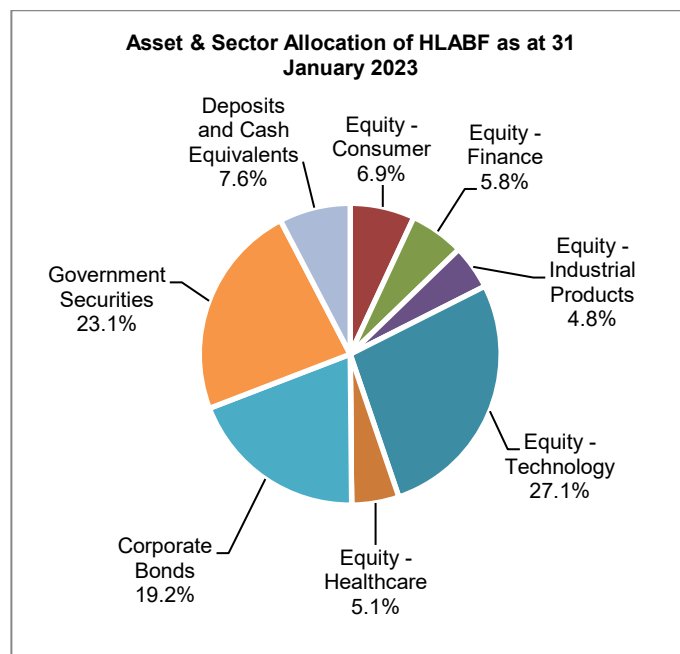

This fund is suitable for investors have conservative to moderate risk-reward temperament and have a medium-to-long term investment horizon.

Market Review, Outlook & Strategy

Equities

During the month, the FTSE BM KLCI declined 0.67% to close at 1,486 points. The broader market outperformed as the FTSE BM EMAS Index rose 1.07% to close at 10,816 points. Small caps underperformed as the FTSE BM Small Cap Index rose 8.29% to close at 16,161 points. Bank Negara Malaysia (BNM) maintained the overnight policy rate (OPR) at 2.75% as BNM is assessing the impact of past cumulative OPR adjustments. On the corporate front, Dialog Group Berhad inked 70:30 production sharing contract with Petroleum Sarawak Berhad to develop Baram Junior Cluster Small Field Asset. Berjaya Food Berhad allocates RM10 million for 5 more Paris Baguette after its maiden Pavilion Kuala Lumpur opening. The Fund will continue to invest in companies that would benefit from superior pricing power and efficient cost management.

Fixed Income

Federal officials are widely expected to raise interest rates by 25 basis points (bps) in the upcoming Federal Open Market Committee (FOMC) meeting in early February, lowering the quantum of the increase for a second straight quarter. Officials are also anticipated to debate on how much further they need to raise interest rates to curb inflation before pausing rate hikes. In spite of this, Fed Reserve (Fed) Chair Jerome Powell is determined to tame inflation, and the market believes that the Fed is unlikely to quickly commence rate cuts this year. The yield on the benchmark 10-year US Treasury ended 36bps lower at 3.51% as of end-January from 3.87% as of end-December. Local Malaysian Government Securities (MGS)/Government Investment Issue rallied strongly after BNM surprised the market with a hold on OPR at 2.75% on 19 January. 3-year and 10-year MGS yields declined by about 27-28bps to 3.39% and 3.80% respectively. Government-guaranteed bond yields fell 10-31bps whilst rated corporate bond yields dropped 14-24bps in January.

US inflation in December 2022 indicated consumer price gains continue to ease driven by reducing food and energy prices. Its headline Consumer Price Index (CPI) fell Year-on-Year (YoY) from 7% to 6.5% whilst core CPI fell from 6% to 5.7% YoY respectively. Meanwhile, FOMC policymakers are also paying close attention to the overall US labour markets as data has been turning negative broadly for a number of months showing signs of weakness. Locally, headline inflation eased to a six-month low of 3.8% YoY in December 2022 from 4% YoY in November primarily due to slower food, transport and recreation services price increases. At the current OPR level, the stance of monetary policy remains accommodative and supportive of economic growth. Central banks are expected to continue raising interest rates, albeit at a slower pace, to manage inflationary pressures. This will continue to pose headwinds to the global growth outlook. In terms of portfolio strategy, we will continue to participate in primary auctions and high investment grade corporate primary bond issuances as well as in the secondary market when opportunity arises.

Investment Risks

All investments carry risks. Policy Owners must be prepared to accept certain degree of risk associated with this Investment. The following are the non-exhaustive list of risks associated to this fund.

- 1. Market Risk**
Market risk stems from the fact that there are other economy-wide perils, which threaten all businesses. It is mainly caused by uncertainties in the economy, political and social environment.
- 2. Liquidity Risk**
Defined as the ease with which a security can be sold at or near its fair value. This risk occurs in thinly traded or illiquid securities. Should the fund need to sell a relatively large amount of such securities, such action itself may significantly depress the selling price.
- 3. Credit Risk**
This refers to the possibility that the issuer of a security will not be able to make timely payments of interest or principal repayment on the maturity date. The default may lead to a fall in the value of the funds.
- 4. Interest Rate Risk**
The level of interest rates has an impact on the value of investments. Any increase in rates will lead to a fall in the value of securities, thus affecting the value of the funds.
- 5. Concentration Risk**
Concentration risk occurs when a portfolio is overweight on a particular security, sector or asset class. As the fund invests mainly into third party collective investment scheme (CIS) and by virtue of the CIS investing in a diversified portfolio of equities as well as dynamic asset allocation strategy between equities and other financial securities, the concentration risk is mitigated.
- 6. Target Fund(s) Risk**
The fund invests in third party CIS which is being managed by another fund manager. The CIS is carefully selected in order to ensure that the objectives of said CIS are appropriately aligned with the fund. Nevertheless, the Fund Manager does not have control over the management of the CIS and any adverse effect on the CIS will inevitably affect the fund. In such instance, the Fund Manager may replace the CIS with another CIS which the Fund Manager considers to be more appropriate or invest directly in a diversified portfolio in order to meet the objective of the fund. Please also refer to the Target Fund's prospectus for more detailed and comprehensive information on Target Fund specific risks.

If the fund invests in Foreign Assets, it will be exposed to the following risks:

- 7. Country Risk**
The foreign investments made by the fund are subjected to risks specific to the country in which it invests. Such risks include changes in a country's economic fundamentals, social and political stability, currency movements, foreign investment policies and etc. The risk may be mitigated by closely monitoring the developments in the countries in order to identify any emerging risk.
- 8. Currency Risk**
This risk applies to foreign investment, in which the investment may rise or fall due to fluctuation in the foreign currencies. Adverse movements in currencies exchange rates can result in a loss to the investment.

HLA Balanced Fund (HLABF)

Risk Management

The Company has in place its authorized investment framework which forms part of the Risk Management process. The authority framework covers the nature and scope of the investment authority that is exercisable by various parties in managing the Company's investments. The potential investment risks that are taken into consideration in managing the fund include economic conditions, liquidity, qualitative and quantitative aspects of the securities. The investment manager(s) have put in place the following controls to reduce the risks through:

- a) having a flexible tactical asset allocation
- b) investing in a wide range of companies across different sectors
- c) setting prudent investment limits on various exposures
- d) taking into account the liquidity factor in selecting securities
- e) engaging in the hedging of foreign currency exposure where appropriate

Basis of Unit Valuation

1. The assets of every fund are to be valued to determine the value at which units of a particular fund can be liquidated or purchased for investment purposes.
2. The unit price of a unit of a fund shall be determined by the Company but in any event shall not be less than the value of fund of the relevant fund (as defined below), divided by the number of units of the given fund in issue on the business day before the valuation date, and the result adjusted to the nearest one hundredth of a cent.
3. The maximum value of any asset of any fund shall not exceed the following price:
 - a) The last transacted market price at which those assets could be purchased or sold on the business day before the valuation date; or
 - b) In the case of securities for which market values are not readily available, the price at which, in our Investment Manager's opinion, the asset may have been purchased on the business day before the valuation date; plus any expenses which would have been incurred in its acquisition.
4. To ensure fair treatment to all unit holders, the cost of acquiring and disposing of assets is recouped by making a transaction cost adjustment to the net asset value per unit.

Exceptional Circumstances

The Company reserves the right to defer the payment of benefits (other than death benefit) under this Policy for a period not exceeding six (6) months from the date the payment would have been normally effected if not for intervening events such as temporary closure of any Stock Exchange in which the fund is invested which the Company, in its discretion, may consider exceptional.

Target Fund Details

Hong Leong Balanced Fund is a Balanced fund managed by Hong Leong Asset Management. The past performance of this fund is as follows:

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022
Performance	9.9%	1.1%	13.6%	1.1%	15.4%	-4.7%	14.0%	15.2%	11.1%	-9.9%

Source: Hong Leong Asset Management

Basis of Calculation of Past Performance

The historical performance of the fund is calculated based on the price difference over the period in consideration compared to the older price of the period in consideration.

$$\frac{\text{Unit Price}_t - \text{Unit Price}_{t-1}}{\text{Unit Price}_{t-1}}$$

For the underlying Target Fund, past performance is calculated after adjusting for distribution and/or additional units, if any.

Others

HLA Balanced Fund is managed by HLA. Any amount invested in this fund is invested by HLA on behalf of Policy Owner in equity, fixed income, collective investment scheme, foreign asset, derivatives and money market instrument/s. If the financial institutions and/or corporations issuing the equity, fixed income, collective investment scheme, foreign asset, derivatives and money market instruments defaults or becomes insolvent, the Policy Owner risks losing part or all of his/her amount that were invested into the instruments on his/her behalf by HLA.

THIS IS AN INSURANCE PRODUCT THAT IS TIED TO THE PERFORMANCE OF THE UNDERLYING ASSETS, AND IS NOT A PURE INVESTMENT PRODUCT SUCH AS UNIT TRUSTS.
