Asset & Sector Allocation of HLAVGF as at 30 Nov 2022

HLA Venture Growth Fund (HLAVGF)

Market Review, Outlook & Strategy

Global equities in November staged a further recovery following a more dovish Fed minutes which signaled a slowdown on the pace of rate hikes, with weakening economic data and outlook in the US that warranted the Fed's pivot from fighting inflation to supporting growth. It remains to be seen whether there would be interest rate cuts in the 2H23 as the Fed minutes also suggest higher terminal rates. Over to China, reopening dominated the headlines in November. Beijing responded earlier-than-expected on easing Omicron restrictions despite cases on the rise, de-risking the property sector with a 16-point rescue plan and stabilised the US-China relationship during both presidents' meeting on the 14th November. Oil price also tumbled by 10% m-o-m to close at US\$85 levels following a proposed price cap of US\$65-70 per barrel on Russian crude by the European Union. Following a more dovish Fed, the Dollar Index also weakened by about 5% m-o-m.

Domestically, we had a major event to contend which was the GE15 that delivered a hung parliament for the first time in Malaysia's history. After days of deliberations, the Yang di-Pertuan Agong finally appointed Dato' Seri Anwar Ibrahim as the nation's 10th Prime Minister. He is expected to lead a unity government comprising mainly of Pakatan Harapan (PH) and Barisan Nasional (BN) MPs. Market thus staged a relief rally post GE15 blues with the index trading briefly above 1,500 level. It was also the 3Q22 results season where most came in within expectations. We saw costs markedly higher with some consumer-related names demonstrated the ability to grow its profitability via successful push-through of price hikes. The FBM KLCI also observed the exit of glove stocks (Top Glove and Hartalega) and were replaced by QL Resources and AMMB.

Average daily trading value increased to RM2.1b in November from RM1.7b in October. Foreign institutions remained net sellers -RM0.3b (Oct: -RM0.6b) while local institutions stayed as net buyers with +RM0.1m (Oct: +RM0.9b). Local retailers turned net buyers +RM0.1b (Oct: -RM0.1b) in November. Retailers, local institutions and foreign institutions accounted for 25%, 34% and 29% respectively of value traded. The 4 major indices rallied further in November, but the FBM KLCI underperformed the broader market. FBM KLCI was up by 2.0% to close at 1,488.80 pts, FBM Shariah +3.6% mom, FBM Emas +2.7% m-o-m and FBMSC +4.5% m-o-m.

On the global front, the key focus events continue to be FOMC narratives and China's state media rhetoric on reopening. Domestically, investors will be keen to see the line-up of the new Cabinet under this new unity government as well as the re-tableting of Budget 2023. We remain defensive, investing in both value and growth names. Sectors that we continue to favour include interest rate hike beneficiaries (banks), selected recovery/reopening names (consumers with pricing power) and 5G/ technology (easing of supply chain bottlenecks).

Actual Annual Investment Returns for the Past Ten (10) Calendar Years

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021
Benchmark	10.3%	10.5%	-5.7%	-3.9%	-3.0%	9.5%	-5.9%	-6.0%	2.4%	-3.7%
HLAVGF - Gross	10.7%	16.3%	-3.2%	-0.6%	-0.1%	26.0%	-16.1%	12.8%	14.2%	-2.6%
HLAVGF - Net	8.5%	13.6%	-4.4%	-1.9%	-1.5%	22.5%	-16.2%	10.3%	11.7%	-3.8%

Net returns are adjusted for tax and fund management fees.

Those are the actual returns in the past ten (10) years, or since inception if shorter, and are strictly the performance of the investment-linked fund. Thus, the returns are not earned on the actual premium paid of the investment-linked product.

Investment Risks

All investments carry risks. Policy Owners must be prepared to accept certain degree of risk associated with this Investment. The following are the non-exhaustive list of risks associated to this fund.

1. Market Risk

Market risk stems from the fact that there are other economy-wide perils, which threaten all businesses. It is mainly caused by uncertainties in the economy, political and social environment.

2. Liquidity Risk

Liquidity risk is the risk that the fund invested cannot be readily sold and converted into cash. This may arise when the trading volume is low and/or where there is a lack of demand for the security.

3. Credit Risk

This refers to the possibility that the issuer of a security will not be able to make timely payments of interest or principal repayment on the maturity date. The default may lead to a fall in the value of the funds.

4. Interest Rate Risk

The level of interest rates has an impact on the value of investments. Any increase in rates will lead to a fall in the value of securities, thus affecting the value of the funds.

5. Country Risk

The foreign investment of a fund may be affected by the political & economic conditions of the country which the investments are made.

6. Currency Risk

This risk is associated with investments that are denominated in foreign currencies. Fluctuation in foreign exchange rates will have an impact on the value of the funds. Derivatives are used to hedge against currency risk. The Fund aims to hedge up to 100% of foreign currency exposure using derivatives.

Risk Management

The company has in place its Authorized Investment Framework which forms part of the Risk Management process. The authority framework covers the nature and scope of the investment authority that is exercisable by various parties in managing the Company's investments. The potential investment risks that are taken into consideration in managing the fund include economic conditions, liquidity, qualitative and quantitative aspects of the securities. The investment manager(s) have put in place the following controls to reduce the risks through:

- having a flexible tactical asset allocation
- investing in a wide range of companies across different sectors
- setting prudent investment limits on various exposures
- taking into account the liquidity factor in selecting securities
- engaging in the hedging of foreign currency exposure where appropriate

HLA Venture Growth Fund (HLAVGF)

Basis of Unit Valuation

1. The assets of every fund are to be valued to determine the value at which units of a particular fund can be liquidated or purchased for investment purposes.
2. The unit price of a unit of a fund shall be determined by the Company but in any event shall not be less than the value of fund of the relevant fund (as defined below), divided by the number of units of the given fund in issue on the business day before the valuation date, and the result adjusted to the nearest one hundredth of a cent.
3. The maximum value of any asset of any fund shall not exceed the following price:
 - a) The last transacted market price at which those assets could be purchased or sold on the business day before the valuation date; or
 - b) In the case of securities for which market values are not readily available, the price at which, in our Investment Manager's opinion, the asset may have been purchased on the business day before the valuation date; plus any expenses which would have been incurred in its acquisition.
4. To ensure fair treatment to all unit holders, the cost of acquiring and disposing of assets is recouped by making a transaction cost adjustment to the net asset value per unit.

Exceptional Circumstances

The Company reserves the right to defer the payment of benefits (other than death benefit) under this Policy for a period not exceeding six (6) months from the date the payment would have been normally effected if not for intervening events such as temporary closure of any Stock Exchange in which the fund is invested which the Company, in its discretion, may consider exceptional.

Basis of Calculation of Past Performance

The historical performance of the fund is calculated based on the price difference over the period in consideration compared to the older price of the period in consideration.

$$\frac{\text{Unit Price}_t - \text{Unit Price}_{t-1}}{\text{Unit Price}_{t-1}}$$

Others
