

# HLA Secure Fund (HLASF)

Jul 2018

## Fund Features

### 1. Investment Objective

To provide investors with steady and consistent return over a long-term investment horizon by investing into local and global fixed income securities and equities.

### 2. Investment Strategy & Approach

The strategy is to provide investors an affordable access into a diversified investment portfolio with a mixture of equities and fixed income instrument. The fund will invest primarily in fixed income instruments such as bonds, money market instruments, repo and deposits with financial institutions that provide regular income as well as in high dividend yield stocks to enhance the fund's returns. The asset allocation decision between fixed income instruments and equity is decided after considering the fixed income and equity market outlook over the medium to long-term horizon. Initially the fund will invest by feeding into Affin Hwang Select Income Fund ("Target Fund"), with the option to increase the number of funds or replace Affin Hwang Select Income Fund with other fund(s) in future.

### 3. Asset Allocation

The fund shall invest a minimum 70% of the NAV in Fixed Income Instruments and maximum 30% of NAV in equities.

### 4. Target Market

The fund is suitable for investors who are relatively conservative and wish to have a steady and stable return that meets their retirement needs.

## Market Review, Outlook & Strategy relevant to Target Fund

Markets stayed volatile in July as trade tensions between the US and other major economies continue, with trade tariffs now in effect and more has been announced. A sharp depreciation of the Chinese Yuan dragged regional Emerging Markets (EM). An index of Asian currencies against the USD was down 3.80% YTD. This was seen to impact China's economic activities, with the PMI for July falling to 51.2 from 51.5 in June, which is also lower than analyst estimates of 51.3. The Bank of Japan maintained its accommodative monetary policy as inflation remains soft. This could continue to support market liquidity while the US Federal Reserve is expected to continue with their gradual rate increase. Asian credits saw better overall performance in July following a soft market in recent months. Perpetual bonds saw signs of revival while the broader JPMorgan Asia Credit Index rebounded by 0.5%. Regional equity indices closed marginally higher in July as the foreign selling of EM assets eased, with the bulk of inflows going into Korea, Thailand and Taiwan. The MSCI Asia ex Japan index was up by 0.34%.

We expect volatility in the market to continue amidst the continued trade tensions and developments on China's deleveraging strategy. We remain cautious and will take this opportunity to trim several credits on the lower end of the quality spectrum. With upbeat sentiments after the PBoC's easing of lending measures, this could spur a large supply of issuances in Q3. Hence, we shall wait for better entry levels and refrain from redeploying too heavily. Cash levels is around the 5% - 10% levels, as we maintain a lower allocation to equities while remaining relatively invested in fixed income. We kept our short duration positioning for the fixed income portfolio while taking on exposure to investments less prone to credit risks, such as going long US Treasuries. For the equities portion, we have been gradually increasing equity exposure, particularly to selective Chinese names we like that had recently been sold down to more attractive levels. We will continue to look for investment opportunities in the region to continue providing investors with steady and regular income.

## HLA Secure Fund (HLASF)

### Actual Annual Investment Returns for the Past Five (5) Calendar Years

Year	2013	2014	2015	2016	2017
Benchmark	7.2%	10.4%	7.7%	8.2%	2.6%
HLASF - Gross	2.5%	9.2%	10.2%	5.6%	12.4%
HLASF - Net	1.3%	7.5%	8.4%	4.1%	10.4%

Net returns are adjusted for tax and fund management fees.

Those are the actual returns in the past five (5) years, or since inception if shorter, and are strictly the performance of the investment-linked fund. Thus, the returns are not earned on the actual premium paid of the investment-linked product.

The fund was only launched on 14 February 2013. The actual investment returns are calculated based on unit price from 14 February 2013 to 31 December 2013.

### Investment Risks

All investments carry risks. Policy Owners must be prepared to accept certain degree of risk associated with this Investment. The following are the non-exhaustive list of risks associated to this fund.

#### 1. Market Risk

Market risk stems from the fact that there are other economy-wide perils, which threaten all businesses. It is mainly caused by uncertainties in the economy, political and social environment.

#### 2. Liquidity Risk

Liquidity risk is the risk that the fund invested cannot be readily sold and converted into cash. This may arise when the trading volume is low and/or where there is a lack of demand for the security.

#### 3. Country Risk

The foreign investment of a fund may be affected by the political & economic conditions of the country which the investments are made.

#### 4. Currency Risk

This risk is associated with investments that are denominated in foreign currencies. Fluctuation in foreign exchange rates will have an impact on the value of the funds.

#### 5. Concentration Risk

This risk is associated with a feeder fund whereby the investments of such fund are not diversified. A feeder fund invests mainly into another collective investment scheme.

### Risk Management

The Company has in place its Authorized Investment Framework which forms part of the Risk Management process. The authority framework will cover the nature and scope of the investment authority that is exercisable by various parties in managing the Company's investments. Besides this, sensitivity and stress testing is conducted to inform the Company's management the profit & loss profiles of their investments under different pre-defined risk scenarios and the necessary action to be taken if the potential losses exceed the Company's risk tolerance level.

### Basis of Unit Valuation

- The assets of every fund are to be valued to determine the value at which units of a particular fund can be liquidated or purchased for investment purposes.
- The unit price of a unit of a fund shall be determined by the Company but in any event shall not be less than the value of fund of the relevant fund (as defined below), divided by the number of units of the given fund in issue on the business day before the valuation date, and the result adjusted to the nearest one hundredth of a cent.
- The maximum value of any asset of any fund shall not exceed the following price:
  - The last transacted market price at which those assets could be purchased or sold on the business day before the valuation date; or
  - In the case of securities for which market values are not readily available, the price at which, in our Investment Manager's opinion, the asset may have been purchased on the business day before the valuation date; plus any expenses which would have been incurred in its acquisition.
- To ensure fair treatment to all unit holders, the cost of acquiring and disposing of assets is recouped by making a transaction cost adjustment to the net asset value per unit.

### Exceptional Circumstances

The Company reserves the right to defer the payment of benefits (other than death benefit) under this Policy for a period not exceeding six (6) months from the date the payment would have been normally effected if not for intervening events such as temporary closure of any Stock Exchange in which the fund is invested which the Company, in its discretion, may consider exceptional.

### Target Fund Details

Affin Hwang Select Income Fund is a Bond fund managed by Affin Hwang Investment Management. The past performance of this fund is as follows:

Year	2013	2014	2015	2016	2017
Performance	2.9%	6.9%	8.6%	4.1%	10.4%

Source: Affin Hwang Investment Management

### Basis of Calculation of Past Performance

The historical performance of the fund is calculated based on the price difference over the period in consideration compared to the older price of the period in consideration.

$$\frac{\text{Unit Price}_t - \text{Unit Price}_{t-1}}{\text{Unit Price}_{t-1}}$$

For the underlying Target Fund, past performance is calculated after adjusting for distribution and/or additional units, if any.

## HLA Secure Fund (HLASF)
