

HLA EverGreen Funds

Feb 2017

Fund Features

1. Investment Objective

The fund is designed to provide investors with principal and enhanced profit protection via a systematic investment in a globally diversified multi asset (equities, currency, rates, commodities, property, hedge fund strategies) long short strategy.

2. Investment Strategy & Approach

The main investment strategy is executed via portfolio optimization methodology. The fund is open ended with defined maturity date. The investment execution is accomplished via a Floating Rate Negotiable Instrument of Deposits ("FRNID") issued by CIMB Bank Berhad.

The FRNID is principal protected at maturity by CIMB Bank. The FRNID dynamically adjusts its exposure to the strategy, such as to reduce exposure when the strategy has negative performance and increase exposure when it has positive performance.

3. Asset Allocation

The fund will invest in a FRNID.

4. Target Market

The fund is suitable for investors who wish to engage in long-term wealth-planning, such as for children's education, retirement planning or wealth-building for future generations, whereby the investor's return on their lifetime of investments will be safely locked at fund maturity.

Market Review (by CIMB Bank Berhad)

Max InvestSave increased by 3.87% in the reported period with eight out of eleven Underlying Assets moving in tandem with the Effective Max InvestSave Weightings. Gains were mainly due to the appreciation of American and Chinese Equities as well as American Real Estate where positive weightings were held by the Global Optimal Weightings.

February 2017 saw American Equities surge to record levels as both major equity benchmarks, the Dow Jones and S&P 500 indices, reached all-time highs. Investors are positive about President Trump's plans to cut taxes and boost spending. Federal Reserve chairperson Janet Yellen has also publicly stated that she would support another interest rate hike if the economy continues to improve as it has done recently. In Europe, equities continued to rally to the highest level in 14 months buoyed by signs of a more broad based economic recovery in the continent. However, the rally did lose steam towards the end of the month as investors worried about stocks being overvalued. The region is also surrounded with some uncertainty as elections in major European economies such as France and Germany will take place later this year.

Japanese equities also showed improvement at the beginning of the month as President Trump's plans to boost the US economy was met with enthusiasm. However, that exuberance mellowed towards the end of the month as they worried that the plans may not be as good as initially thought. OPEC members also floated the idea of extending their pact to cut production beyond the initial 6 month period to provide further support for oil prices.

Net returns are adjusted for tax and fund management fees.

Those are the actual returns in the past five (5) years, or since inception if shorter, and are strictly the performance of the investment-linked fund. Thus, the returns are not earned on the actual premium paid of the investment-linked product.

Investment Risks

All investments carry risks. Policy Owners must be prepared to accept certain degree of risk associated with this Investment. The following are the detailed explanation of the risk associated to this fund.

1. Market Risk

Market risk stems from the fact that there are other economy-wide perils, which threaten all businesses. It is mainly caused by uncertainties in the economy, political and social environment.

2. Liquidity Risk

Liquidity risk is the risk that the fund invested cannot be readily sold and converted into cash. This may arise when the trading volume is low and/or where there is a lack of demand for the security.

3. Credit Risk

This refers to the possibility that the issuer of a security will not be able to make timely payments of interest or principal repayment on the maturity date. The default may lead to a fall in the value of the funds.

4. Interest Rate Risk

The level of interest rates has an impact on the value of investments. Any increase in rates will lead to a fall in the value of securities, thus affecting the value of the funds.

5. Country Risk

The foreign investment of a fund may be affected by the political & economic conditions of the country which the investments are made.

HLA EverGreen Funds

6. Deleverage Risk

Deleveraging may occur if the bond floor rises due to falling interest rates or due to nearing maturity, or due to sustained underperformance of the underlying asset. When this occurs, the Funds will unwind all allocation to the underlying asset and will effectively become a zero-coupon bond fund.

7. Currency Risk

This risk is associated with investments that are denominated in foreign currencies. Fluctuation in foreign exchange rates will have an impact on the value of the funds.

8. Performance Risk

This risk is associated with a feeder fund whereby the investments of such fund are not diversified. A feeder fund invests mainly into another collective investment scheme.

Risk Management

The Company has in place its Authorized Investment Framework which forms part of the Risk Management process. The authority framework will cover the nature and scope of the investment authority that is exercisable by various parties in managing the Company's investments. Besides this, sensitivity and stress testing is conducted to inform the Company's management the profit & loss profiles of their investments under different pre-defined risk scenarios and the necessary action to be taken if the potential losses exceed the Company's risk tolerance level.

Basis of Unit Valuation

- The assets of every fund are to be valued to determine the value at which units of a particular fund can be liquidated or purchased for investment purposes.
- The unit price of a unit of a fund shall be determined by the Company but in any event shall not be less than the value of fund of the relevant fund (as defined below), divided by the number of units of the given fund in issue on the business day before the valuation date, and the result adjusted to the nearest one hundredth of a cent.
- The maximum value of any asset of any fund shall not exceed the following price:
 - The last transacted market price at which those assets could be purchased or sold on the business day before the valuation date; or
 - In the case of securities for which market values are not readily available, the price at which, in our Investment Manager's opinion, the asset may have been purchased on the business day before the valuation date; plus any expenses which would have been incurred in its acquisition.
- To ensure fair treatment to all unit holders, the cost of acquiring and disposing of assets is recouped by making a transaction cost adjustment to the net asset value per unit.

Exceptional Circumstances

The Company reserves the right to defer the payment of benefits (other than death benefit) under this Policy for a period not exceeding six (6) months from the date the payment would have been normally effected if not for intervening events such as temporary closure of any Stock Exchange in which the fund is invested which the Company, in its discretion, may consider exceptional.

HLA EverGreen Funds

Performance of CIMB EverGreen Index Against Other Indices

Performance of CIMB EverGreen Index Against Other Indices

Basis of Calculation of Past Performance

The historical performance of the fund is calculated based on the price difference over the period in consideration compared to the older price of the period in consideration.

$$\frac{\text{Unit Price}_t - \text{Unit Price}_{t-1}}{\text{Unit Price}_{t-1}}$$

Others

HLA EverGreen Funds are managed by Hong Leong Assurance Berhad (HLA). Allocated premiums of the policy invested in the fund are invested by HLA on behalf of the Policy Owner in a FRNID issued by CIMB Bank Berhad. The amount invested in the FRNID is guaranteed by the issuer if held to maturity. If the issuer of the FRNID defaults or becomes insolvent, the Policy Owner risks losing part or all of his/her allocated premium amounts that were invested into the FRNID on his/her behalf by HLA. Should the issuer/financial institutions default the above investment instrument, the Minimum Guaranteed Unit Price at Fund Maturity will not be applicable.

THIS IS AN INSURANCE PRODUCT THAT IS TIED TO THE PERFORMANCE OF THE UNDERLYING ASSETS, AND IS NOT A PURE INVESTMENT PRODUCT SUCH AS UNIT TRUSTS.

Disclaimer:

Policy Owner must evaluate your options carefully and satisfy yourself that the investment-linked fund chosen meets your risk appetite. Past performance of the fund is not an indication of its future performance. The intention of this document is to enable Policy Owner to better understand the fund features and details in order to assist Policy Owner to making an informed decision.
