## Asset & Sector Allocation of HLAVGF as at 31 March 2023

# HLA Venture Growth Fund (HLAVGF)

## Market Review, Outlook & Strategy

During the month, global financials experienced a crisis of confidence triggered by the collapse of Silicon Valley Bank (SVB). The turmoil has led to the seizure of SVB and Signature Bank, the private-sector bailout of the US regional lender First Republic Bank and the takeover of Credit Suisse by its rival, UBS. Following the Federal Deposit Insurance Corporation's (FDIC) guarantee of all deposits at the banks it has taken over, combined with the Fed's new Bank Term Funding Program – allowing banks to pledge Treasuries at par for funding – should help contain any potential deposit-flight contagion. Despite the ongoing banking turmoil, the Fed continued with its inflation-fighting campaign with a 25bps hike to rates which lifted Fed Funds Target rate to 4.75-5%. Sentiment fared better in the North Asia and China markets thanks to Beijing's further support to the internet and gaming sectors. While the GDP growth target of 5% unveiled during the National People's Congress disappointed investors, SOE reforms surprised investors positively and drove returns in the telco, oil and construction sectors.

Domestically, it was a relatively quiet month in terms of announcements. Bank Negara Malaysia kept the Overnight Policy Rate unchanged at 2.75% and projects GDP growth to moderate to 4-5% yoy in 2023 from 2022's +8.7% yoy. Headline and core inflation will continue to average above long-term averages at 2.8-3.8% in 2023. The Prime Minister Anwar Ibrahim's trip to Beijing has garnered much interest as both the Prime Minister and MITI minister promised "major investment" announcements to follow, despite the lack of further details till date.

Average daily trading value decreased to RM2.0b in March from Feb's RM2.3b. Foreign investors stayed net sellers at -RM1.4b, while local institutions turned net buyers at +RM1.3b. Local retailers remained as net buyers at +RM0.1b. Foreign, local institutions and retailers accounted for 25.9%, 34.2% and 26.9% respectively of value traded. The best-performing sectoral indices in Mar 23 were healthcare, utilities and property whilst the worst three performing sectors were transportation, industrial products and financials. In March, the FBM KLCI underperformed the broader market with a negative return of -2.2% m-o-m to close at 1,422.6 points. The FBM Shariah, FBM Emas and FBMSC declined by -0.8% m-o-m, -1.5% m-o-m and -1.1% m-o-m respectively.

Globally, investors will continue to monitor US bond yield movements, where the 10-Year had retraced from 4% to 3.42%, global monetary policies as well as any potential cracks within the developed economies. As for HK/ China markets, investors will focus on datapoints and corporate guidance on China's consumption recovery and outbound travel as economic activities continue to normalize. Domestically, there could potentially be more political sound bites as 6 state elections are expected to be held by mid-2023. We remain defensive, investing in value, growth and dividend-yielding names. Sectors that we continue to favour include selected recovery/reopening names (consumers with pricing power) and 5G/ technology (easing of supply chain bottlenecks). We are neutral on interest rate hike beneficiaries (banks) given the peak in inflation.

## Actual Annual Investment Returns for the Past Ten (10) Calendar Years

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022
<b>Benchmark</b>	10.5%	-5.7%	-3.9%	-3.0%	9.5%	-5.9%	-6.0%	2.4%	-3.7%	-4.6%
<b>HLAVGF- Gross</b>	16.3%	-3.2%	-0.6%	-0.1%	26.0%	-16.1%	12.8%	14.2%	-2.6%	-6.1%
<b>HLAVGF - Net</b>	13.6%	-4.4%	-1.9%	-1.5%	22.5%	-16.2%	10.3%	11.7%	-3.8%	-7.0%

Net returns are adjusted for tax and fund management fees.

Those are the actual returns in the past ten (10) years, or since inception if shorter, and are strictly the performance of the investment-linked fund. Thus, the returns are not earned on the actual premium paid of the investment-linked product.

**Notice: Past performance of the fund is not an indication of its future performance**

## Investment Risks

All investments carry risks. Policy Owners must be prepared to accept certain degree of risk associated with this Investment. The following are the non-exhaustive list of risks associated to this fund.

### 1. Market Risk

Market risk stems from the fact that there are other economy-wide perils, which threaten all businesses. It is mainly caused by uncertainties in the economy, political and social environment.

### 2. Liquidity Risk

Liquidity risk is the risk that the fund invested cannot be readily sold and converted into cash. This may arise when the trading volume is low and/or where there is a lack of demand for the security.

### 3. Credit Risk

This refers to the possibility that the issuer of a security will not be able to make timely payments of interest or principal repayment on the maturity date. The default may lead to a fall in the value of the funds.

### 4. Interest Rate Risk

The level of interest rates has an impact on the value of investments. Any increase in rates will lead to a fall in the value of securities, thus affecting the value of the funds.

### 5. Country Risk

The foreign investment of a fund may be affected by the political & economic conditions of the country which the investments are made.

### 6. Currency Risk

This risk is associated with investments that are denominated in foreign currencies. Fluctuation in foreign exchange rates will have an impact on the value of the funds. Derivatives are used to hedge against currency risk. The Fund aims to hedge up to 100% of foreign currency exposure using derivatives.

## Risk Management

The company has in place its Authorized Investment Framework which forms part of the Risk Management process. The authority framework covers the nature and scope of the investment authority that is exercisable by various parties in managing the Company's investments. The potential investment risks that are taken into consideration in managing the fund include economic conditions, liquidity, qualitative and quantitative aspects of the securities. The investment manager(s) have put in place the following controls to reduce the risks through:

- having a flexible tactical asset allocation
- investing in a wide range of companies across different sectors
- setting prudent investment limits on various exposures
- taking into account the liquidity factor in selecting securities
- engaging in the hedging of foreign currency exposure where appropriate

## HLA Venture Growth Fund (HLAVGF)

### Basis of Unit Valuation

1. The assets of every fund are to be valued to determine the value at which units of a particular fund can be liquidated or purchased for investment purposes.
2. The unit price of a unit of a fund shall be determined by the Company but in any event shall not be less than the value of fund of the relevant fund (as defined below), divided by the number of units of the given fund in issue on the business day before the valuation date, and the result adjusted to the nearest one hundredth of a cent.
3. The maximum value of any asset of any fund shall not exceed the following price:
  - a) The last transacted market price at which those assets could be purchased or sold on the business day before the valuation date; or
  - b) In the case of securities for which market values are not readily available, the price at which, in our Investment Manager's opinion, the asset may have been purchased on the business day before the valuation date; plus any expenses which would have been incurred in its acquisition.
4. To ensure fair treatment to all unit holders, the cost of acquiring and disposing of assets is recouped by making a transaction cost adjustment to the net asset value per unit.

### Exceptional Circumstances

The Company reserves the right to defer the payment of benefits (other than death benefit) under this Policy for a period not exceeding six (6) months from the date the payment would have been normally effected if not for intervening events such as temporary closure of any Stock Exchange in which the fund is invested which the Company, in its discretion, may consider exceptional.

### Basis of Calculation of Past Performance

The historical performance of the fund is calculated based on the price difference over the period in consideration compared to the older price of the period in consideration.

$$\frac{\text{Unit Price}_t - \text{Unit Price}_{t-1}}{\text{Unit Price}_{t-1}}$$

### Others

HLA Venture Growth Fund is managed by Hong Leong Assurance Berhad (HLA). Any amount invested in this fund is invested by HLA on behalf of Policy Owner in equity, fixed income, collective investment scheme, foreign asset, derivatives and money market instrument/s. If the financial institutions and/or corporations issuing the equity, fixed income, collective investment scheme, foreign asset, derivatives and money market instruments defaults or insolvent, the Policy Owner risks losing part or all of his/her amount that were invested into the instruments on his/her behalf by HLA.

**THIS IS AN INSURANCE PRODUCT THAT IS TIED TO THE PERFORMANCE OF THE UNDERLYING ASSETS, AND IS NOT A PURE INVESTMENT PRODUCT SUCH AS UNIT TRUSTS.**
