

HLA Venture Income Fund (HLAVIF)

Mar 2021

Fund Features

1. Investment Objective

The objective of the fund is to achieve high principal security and steady income by investing in fixed-income instruments. Returns will be comparable to prevailing interest rates but correspondingly, the risks will be significantly lower than that for equities investment.

2. Investment Strategy & Approach

This fund focuses on fixed income securities and money market instruments as well as benchmarked against Maybank's 3 months fixed deposit rate. This fund is suitable for investors who have low to moderate risk profile.

3. Asset Allocation

The fund will invest up to 100% of its NAV in fixed income instruments.

4. Target Market

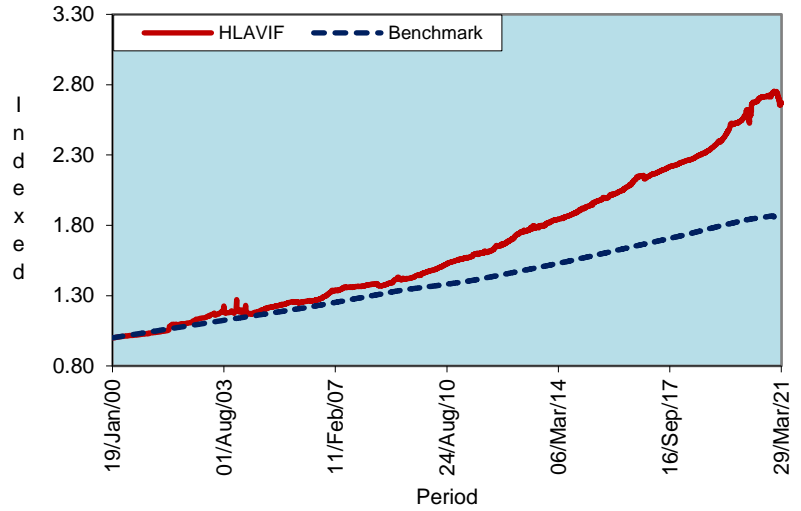

This fund is suitable for investors who have low to moderate risk profile

Total Top 5	59.4

HLA Venture Income Fund (HLAVIF)

Market Review

The yield curve of the U.S. Treasury (“UST”) continued to steepen in the month of March, driven largely by expectations of inflation and economic growth. Tenors of the 5-, 10- and 30-years increased by 18, 34 and 26 bps m-o-m respectively as a result of such expectations. The optimism on economic recovery was driven chiefly by the USD1.9 trillion which passed the voting on both houses and was signed in by the President coupled with the promising vaccine progress currently underway. Additionally, some positive economic data which include the PMI index increasing to 58.6, above the Bloomberg consensus of 58.5 and the non-farm payroll increasing by 379,000, higher than January’s increase of 166,000 and Bloomberg’s estimate of 200,000 partly fueled the bets on economic recovery. The Fed chairman’s assurance that low interest rates will be maintained even if inflation reaches above 2.0% this year seemed to have little impact on market sentiment as the 10-year UST yield rose above the 1.75% level, its highest since January 2020. President Biden will also propose a USD2 trillion package to invest in traditional projects like roads and bridges alongside tackling climate change and boosting human services such as elder care. The tab is expected to grow to a combined USD4 trillion once he rolls out the second part of his economic plan in April. Additional economic growth prospects helped push yields higher.

On the local front, the govies yield continued to mirror the general movement of the UST with the 10-, 15- and 30-year MGS increasing by 17, 9 and 8bps m-o-m respectively. Apart from the UST influence, some fundamental local dynamics have also contributed to the steepening of the local yield curve. The removal of the conditions for the i-sinar EPF withdrawals has led to speculations that some selloff in EPF’s govies holdings could arise in anticipation of said withdrawals. Moreover, the new PEMERKASA package which will provide RM11 billion in direct fiscal support is anticipated to increase the supply of govies as the Ministry of Finance (“MOF”) has indicated that part of direct fiscal support will be funded by way of borrowings. A key part of the new package is to fund the acceleration of the Covid-19 immunisation programme. The acceleration could bring forward the herd immunity target date from 1Q2022 to December 2021, further fueling the prospect of economic recovery. Some support in local govies was seen towards the end of the month after FTSE Russel announced that Malaysia will retain its membership in the WGBI.

The corporate bond segment saw the AAA spread against the MGS increasing m-o-m with the 3-, 5-, 10-, and 15-year AAA tenor increasing by 22, 19, 32 and 30bps m-o-m respectively. Investor’s demand preference continued to centre on liquid and strong investment grades bonds with AAA and GG bonds comprising the bulk of daily transactions. Some prominent new issuances during the month were LPPSA (RM4.0 billion, GG), Tanjung Bin Energy (RM2.97 billion, AA1), Petroleum Sarawak Exploration & Production Sdn Berhad (RM1.5 billion, AAA), PTPTN (RM1.0 billion, GG), FELDA (RM2.005 billion, GG) and Cellco Capital Berhad (RM500.0 million, AA).

Market Outlook & Strategy

In the near future, the current momentum behind expectations for economic growth and inflation is unlikely to significantly abate. Such view is underpinned by the progress of vaccine immunisation programmes in the US and Malaysia coupled with the introduction of new economic packages. The progress of the vaccine immunisation program in the US and Malaysia will be closely monitored to gauge the likely pace and magnitude of economic recovery. UST yield curve could steepen as a result of the anticipated increase in debt supply to fund the proposed USD2 trillion packages. Close attention will be directed to the progress of the US’s proposed infrastructure bills and the funding plans for it. The rise in UST yield could potentially spill over to the local bond yields. As such, we remain defensive and will focus on trading rather than investment in the current volatile trading environment to enhance the portfolio return.

Actual Annual Investment Returns for the Past Ten (10) Calendar Years

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020
Benchmark	2.8%	3.1%	3.1%	3.2%	3.2%	3.1%	3.0%	3.3%	3.0%	1.5%
HLAVIF - Gross	4.8%	10.0%	5.4%	5.8%	6.5%	6.9%	5.3%	5.6%	10.2%	9.0%
HLAVIF - Net	3.9%	8.7%	4.5%	4.8%	5.5%	5.8%	4.4%	4.6%	8.9%	7.8%

Net returns are adjusted for tax and fund management fees.

Those are the actual returns in the past ten (10) years, or since inception if shorter, and are strictly the performance of the investment-linked fund. Thus, the returns are not earned on the actual premium paid of the investment-linked product.

Notice: Past performance of the fund is not an indication of its future performance.

Investment Risks

All investments carry risks. Policy Owners must be prepared to accept certain degree of risk associated with this Investment. The following are the non-exhaustive list of risks associated to this fund.

- Market Risk**
Market risk stems from the fact that there are other economy-wide perils, which threaten all businesses. It is mainly caused by uncertainties in the economy, political and social environment.
- Liquidity Risk**
Liquidity risk is the risk that the fund invested cannot be readily sold and converted into cash. This may arise when the trading volume is low and/or where there is a lack of demand for the security.
- Credit Risk**
This refers to the possibility that the issuer of a security will not be able to make timely payments of interest or principal repayment on the maturity date. The default may lead to a fall in the value of the funds.
- Interest Rate Risk**
The level of interest rates has an impact on the value of investments. Any increase in rates will lead to a fall in the value of securities, thus affecting the value of the funds.
- Country Risk**
The foreign investment of a fund may be affected by the political & economic conditions of the country which the investments are made.
- Currency Risk**
This risk is associated with investments that are denominated in foreign currencies. Fluctuation in foreign exchange rates will have an impact on the value of the funds.

Risk Management

The company has in place its Authorized Investment Framework which forms part of the Risk Management process. The authority framework covers the nature and scope of the investment authority that is exercisable by various parties in managing the Company’s investments. The potential investment risks that are taken into consideration in managing the fund include economic conditions, liquidity, qualitative and quantitative aspects of the securities. The investment manager(s) have put in place the following controls to reduce the risks through:

- having a flexible tactical asset allocation
- investing in a wide range of companies across different sectors
- setting prudent investment limits on various exposures
- taking into account the liquidity factor in selecting securities
- engaging in the hedging of foreign currency exposure where appropriate

HLA Venture Income Fund (HLAVIF)

Basis of Unit Valuation

1. The assets of every fund are to be valued to determine the value at which units of a particular fund can be liquidated or purchased for investment purposes.
2. The unit price of a unit of a fund shall be determined by the Company but in any event shall not be less than the value of fund of the relevant fund (as defined below), divided by the number of units of the given fund in issue on the business day before the valuation date, and the result adjusted to the nearest one hundredth of a cent.
3. The maximum value of any asset of any fund shall not exceed the following price:
 - (a) The last transacted market price at which those assets could be purchased or sold on the business day before the valuation date; or
 - (b) In the case of securities for which market values are not readily available, the price at which, in our Investment Manager's opinion, the asset may have been purchased on the business day before the valuation date; plus any expenses which would have been incurred in its acquisition.
4. To ensure fair treatment to all unit holders, the cost of acquiring and disposing of assets is recouped by making a transaction cost adjustment to the net asset value per unit.

Exceptional Circumstances

The Company reserves the right to defer the payment of benefits (other than death benefit) under this Policy for a period not exceeding six (6) months from the date the payment would have been normally effected if not for intervening events such as temporary closure of any Stock Exchange in which the fund is invested which the Company, in its discretion, may consider exceptional.

Basis of Calculation of Past Performance

The historical performance of the fund is calculated based on the price difference over the period in consideration compared to the older price of the period in consideration.

$$\frac{\text{Unit Price}_t - \text{Unit Price}_{t-1}}{\text{Unit Price}_{t-1}}$$

Others
