HLA Venture Dana Putra (HLAVDP)

Market Review, Outlook & Strategy

Despite a backdrop of disappointing macro data which was largely due to tightening of monetary policies, global equities together with most risk assets recovered in July. The recovery was on the back of a less hawkish Fed and a relatively strong earnings season. During the month, as widely anticipated the FOMC increased the Fed Fund Rates (FFR) by 75bps bringing it to 2.25%-2.5% and the rate hike trajectory going forward will be data dependent. The Fed Chair also reiterated his view that rates could reach 3%-3.5% by year end. While the global economy is showing signs of slow-down and the US entered a technical recession in 2Q22 with a GDP growth of -0.9% qoq (marking two consecutive quarters of negative GDP growth), based on broad measures of economic activity there are no grounds to support a recession call. The recent retracement in commodity prices and some indicators which suggest the easing of supply chain bottlenecks are a relief for inflation pressures. Meanwhile, the HK/ China markets saw correction due to macro concerns involving property completion, rural banks, ADR listing and the US-China tariff talks. Market was also disappointed following the conclusion of the Politburo session on 28th July which did not suggest any big stimulus despite the economic slowdown.

Domestically, Bank Negara Malaysia (BNM) hiked the Overnight Policy Rate by 25bps to 2.25% in July and market now expects another 25bps in 2H22. Malaysia was also not spared by rising costs with CPI hitting 3.4% in June mainly caused by rising food cost. It was reported that Petronas is forecasted to contribute around RM55-59b to the government this year to help negate the higher subsidies of ~RM80b. On a positive note, we saw Indonesia lifting its restrictions on the entry of its workforce into Malaysia and to integrate the existing system between the Malaysian Immigration Department and the Indonesian Embassy in Kuala Lumpur for the recruitment of Indonesia domestic workers. Near month-end, the Dewan Rakyat also passed the proposed anti-party hopping law with more than two-thirds majority.

Average daily trading value decreased to RM1.3b in July from June's RM2.6b. Retailers turned net sellers with -RM0.1b together with local institutions - RM0.2b. Foreign institutions turned net buyers with +RM0.2b. Retailers and local institutions accounted for 25.5% and 35.7% of value traded. Foreign institutions accounted for 28.3% of value traded. FBMKLCI outperformed the broader market with a +3.3% gain to 1,492.23pts. FBM Shariah, FBM Emas and FBMSC increased by 2.2% mom, 2.9% mom and 0.5% mom respectively.

Going into August, investors will continue to keep a close eye on global inflation and interest rates as well as the ongoing developments of the Russia-Ukraine war. Rising US-China tensions is also a concern following US House Speaker Nancy Pelosi's visit to Taiwan, defying China's warnings of "grave consequences" for diplomatic relations. Domestically, it will also be the 2Q results season where investors will be keen to observe how corporate earnings are being affected by rising costs and supply chain disruptions, together with their forward guidance which could provide a decent respite to the ongoing uncertainties. Malaysia's 2Q22 GDP figures will also be released mid this month. We remain defensive and will maintain our barbell strategy by investing in both the value and growth sectors, together with dividend-yielding stocks. Sectors that we continue to favour include interest rate hike beneficiaries (banks), selected recovery/reopening names (consumers with pricing power) and 5G/ technology (easing of supply chain bottlenecks).

Actual Annual Investment Returns for the Past Ten (10) Calendar Years

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021
Benchmark	11.9%	13.3%	-4.2%	2.4%	-6.1%	10.7%	-13.5%	3.9%	10.1%	-6.8%
HLAVDP- Gross	10.0%	32.6%	-1.1%	4.9%	-2.4%	20.8%	-17.8%	10.5%	22.0%	3.9%
HLAVDP - Net	7.8%	28.6%	-2.4%	3.1%	-3.6%	17.7%	-17.7%	8.3%	18.9%	2.1%

Net returns are adjusted for tax and fund management fees.

Those are the actual returns in the past ten (10) years, or since inception if shorter, and are strictly the performance of the investment-linked fund. Thus, the returns are not earned on the actual premium paid of the investment-linked product.

Notice: Past performance of the fund is not an indication of its future performance.

Investment Risks

All investments carry risks. Policy Owners must be prepared to accept certain degree of risk associated with this Investment. The following are the non-exhaustive list of risks associated to this fund.

1. Market Risk

Market risk stems from the fact that there are other economy-wide perils, which threaten all businesses. It is mainly caused by uncertainties in the economy, political and social environment.

2. Liquidity Risk

Liquidity risk is the risk that the fund invested cannot be readily sold and converted into cash. This may arise when the trading volume is low and/or where there is a lack of demand for the security.

3. Credit Risk

This refers to the possibility that the issuer of a security will not be able to make timely payments of interest or principal repayment on the maturity date. The default may lead to a fall in the value of the funds.

4. Interest Rate Risk

The level of interest rates has an impact on the value of investments. Any increase in rates will lead to a fall in the value of securities, thus affecting the value of the funds.

Risk Management

The company has in place its Authorized Investment Framework which forms part of the Risk Management process. The authority framework covers the nature and scope of the investment authority that is exercisable by various parties in managing the Company's investments. The potential investment risks that are taken into consideration in managing the fund include economic conditions, liquidity, qualitative and quantitative aspects of the securities. The investment manager(s) have put in place the following controls to reduce the risks through:

- having a flexible tactical asset allocation
- investing in a wide range of companies across different sectors
- setting prudent investment limits on various exposures
- taking into account the liquidity factor in selecting securities
- engaging in the hedging of foreign currency exposure where appropriate

HLA Venture Dana Putra (HLAVDP)

Basis of Unit Valuation

1. The assets of every fund are to be valued to determine the value at which units of a particular fund can be liquidated or purchased for investment purposes.
2. The unit price of a unit of a fund shall be determined by the Company but in any event shall not be less than the value of fund of the relevant fund (as defined below), divided by the number of units of the given fund in issue on the business day before the valuation date, and the result adjusted to the nearest one hundredth of a cent.
3. The maximum value of any asset of any fund shall not exceed the following price:
 - a) The last transacted market price at which those assets could be purchased or sold on the business day before the valuation date; or
 - b) In the case of securities for which market values are not readily available, the price at which, in our Investment Manager's opinion, the asset may have been purchased on the business day before the valuation date; plus any expenses which would have been incurred in its acquisition.
4. To ensure fair treatment to all unit holders, the cost of acquiring and disposing of assets is recouped by making a transaction cost adjustment to the net asset value per unit.

Exceptional Circumstances

The Company reserves the right to defer the payment of benefits (other than death benefit) under this Policy for a period not exceeding six (6) months from the date the payment would have been normally effected if not for intervening events such as temporary closure of any Stock Exchange in which the fund is invested which the Company, in its discretion, may consider exceptional.

Basis of Calculation of Past Performance

The historical performance of the fund is calculated based on the price difference over the period in consideration compared to the older price of the period in consideration.

$$\frac{\text{Unit Price}_t - \text{Unit Price}_{t-1}}{\text{Unit Price}_{t-1}}$$

Others

HLA Venture Dana Putra is managed by Hong Leong Assurance Berhad (HLA).
