

HLA Venture Income Fund (HLAVIF)

Jun 2017

Fund Features

1. Investment Objective

The objective of the fund is to achieve high principal security and steady income by investing in fixed-income instruments. Returns will be comparable to prevailing interest rates but correspondingly, the risks will be significantly lower than that for equities investment.

2. Investment Strategy & Approach

This fund focuses on fixed income securities and money market instruments as well as benchmarked against Maybank's 3 months fixed deposit rate. This fund is suitable for investors who have low to moderate risk profile.

3. Asset Allocation

The fund will invest up to 100% of its NAV in fixed income instruments.

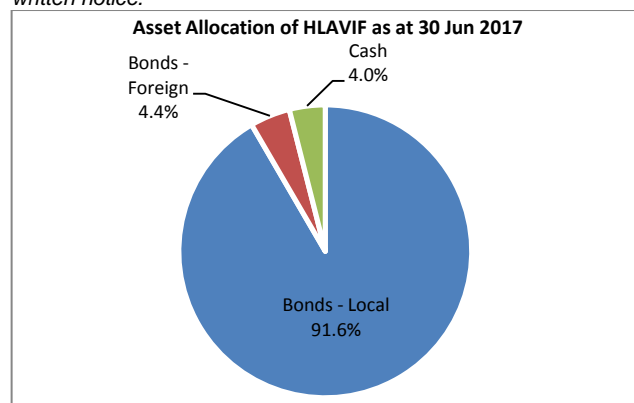

4. Target Market

This fund is suitable for investors who have low to moderate risk profile

Market Review

In the month of June, the MGS market began on a quiet and bearish bias as investors were cautious ahead of the Fed's FOMC meeting where a 25bps rate hike was expected. The MGS yield curve especially from the 5 to 15-years moved upwards as demand was affected by the weaker ringgit, soft oil prices and higher 5-year CDS. Towards month end, trading was also tepid due to the long festive break. As at month end, the 3-, 5-, 7-, 10-, 15-, 20- and 30-year benchmark MGS yields closed at 3.36%, 3.624%, 3.898%, 3.931%, 4.377%, 4.556% and 4.772% respectively while the Ringgit settled at USD/RM4.2933, 0.28% higher than last month's closing.

On the economic front, the US Fed hiked rates by 25bps to 1.00%- 1.25%, as widely expected, citing tightness of the labour market while also downplaying recent weak inflation as transitory. The Fed had also confirmed that it would start shrinking its balance sheet this year. The Fed also raised its forecast of real GDP growth to 2.2% in 2017 from the previous estimate of 2.1%.

Market Outlook & Strategy

On a similar tone, trading volume for corporate bonds/sukuk saw razor thin transactions tracking activities in the MYR govies space. However, primary issuance is anticipated to pick up after the Raya break. We will focus on the primary pipeline for yield pickup and cherry pick on some secondary bonds into any sell off.

HLA Venture Income Fund (HLAVIF)

Actual Annual Investment Returns for the Past Five (5) Calendar Years

| Year | 2012 | 2013 | 2014 | 2015 | 2016 |
|---------------|-------|------|------|------|------|
| Benchmark | 3.1% | 3.1% | 3.2% | 3.2% | 3.1% |
| HLAVIF- Gross | 10.0% | 5.4% | 5.8% | 6.5% | 6.9% |
| HLAVIF - Net | 8.7% | 4.5% | 4.8% | 5.5% | 5.8% |

Net returns are adjusted for tax and fund management fees.

Those are the actual returns in the past five (5) years, or since inception if shorter, and are strictly the performance of the investment-linked fund. Thus, the returns are not earned on the actual premium paid of the investment-linked product.

Investment Risks

All investments carry risks. Policy Owners must be prepared to accept certain degree of risk associated with this Investment. The following are the detailed explanation of the risk associated to this fund.

1. Market Risk

Market risk stems from the fact that there are other economy-wide perils, which threaten all businesses. It is mainly caused by uncertainties in the economy, political and social environment.

2. Liquidity Risk

Liquidity risk is the risk that the fund invested cannot be readily sold and converted into cash. This may arise when the trading volume is low and/or where there is a lack of demand for the security.

3. Credit Risk

This refers to the possibility that the issuer of a security will not be able to make timely payments of interest or principal repayment on the maturity date. The default may lead to a fall in the value of the funds.

4. Interest Rate Risk

The level of interest rates has an impact on the value of investments. Any increase in rates will lead to a fall in the value of securities, thus affecting the value of the funds.

5. Country Risk

The foreign investment of a fund may be affected by the political & economic conditions of the country which the investments are made.

6. Currency Risk

This risk is associated with investments that are denominated in foreign currencies. Fluctuation in foreign exchange rates will have an impact on the value of the funds.

Risk Management

The Company has in place its Authorized Investment Framework which forms part of the Risk Management process. The authority framework will cover the nature and scope of the investment authority that is exercisable by various parties in managing the Company's investments. Besides this, sensitivity and stress testing is conducted to inform the Company's management the profit & loss profiles of their investments under different pre-defined risk scenarios and the necessary action to be taken if the potential losses exceed the Company's risk tolerance level.

Basis of Unit Valuation

- The assets of every fund are to be valued to determine the value at which units of a particular fund can be liquidated or purchased for investment purposes.
- The unit price of a unit of a fund shall be determined by the Company but in any event shall not be less than the value of fund of the relevant fund (as defined below), divided by the number of units of the given fund in issue on the business day before the valuation date, and the result adjusted to the nearest one hundredth of a cent.
- The maximum value of any asset of any fund shall not exceed the following price:
 - The last transacted market price at which those assets could be purchased or sold on the business day before the valuation date; or
 - In the case of securities for which market values are not readily available, the price at which, in our Investment Manager's opinion, the asset may have been purchased on the business day before the valuation date; plus any expenses which would have been incurred in its acquisition.
- To ensure fair treatment to all unit holders, the cost of acquiring and disposing of assets is recouped by making a transaction cost adjustment to the net asset value per unit.

Exceptional Circumstances

The Company reserves the right to defer the payment of benefits (other than death benefit) under this Policy for a period not exceeding six (6) months from the date the payment would have been normally effected if not for intervening events such as temporary closure of any Stock Exchange in which the fund is invested which the Company, in its discretion, may consider exceptional.

Basis of Calculation of Past Performance

The historical performance of the fund is calculated based on the price difference over the period in consideration compared to the older price of the period in consideration.

$$\frac{\text{Unit Price}_t - \text{Unit Price}_{t-1}}{\text{Unit Price}_{t-1}}$$

Others

HLA Venture Income Fund is managed by Hong Leong Assurance Berhad (HLA).
